30mm

1500mm

Please allow a 30mm quiet area for any important content from the very top of the artwork. This will ensure the top metal rail doesn’t interfere with your design.

Artwork should be supplied with fonts outlined as PDF (prefered), AI or EPS.

Please remove all guides and marks and convert all colours to CMYK before supplying your print-ready file(s).

2000mm

Please make full use of the bleed area when exporting your print-ready file(s).

Please allow a small quiet area for any important content away from the bottom section. This is to safely ensure your design has some breathing space.

50mm

150mm

The bottom 150mm must only be used for background colours/images or left blank. This section will be hidden and rolled into the unit mechanism. Your 2m tall design should bleed at least a third of the way into this area to allow for any height variance of the unit and prevent any white edge showing.
