### About Us

**terroir | tribeca** opened in Spring 2010. The space was a cheese production facility back when Washington Market thrived along the Hudson River. Interiors, designed by Richard Lewis, repurposed the original, roughhewn wood and burnished, time-worn metal fabrications to stand tribute to Tribeca's history as one of America's first post-industrial neighborhoods. The drive of the food and beverage program is to give voice to place...all of our wines / beers / foodstuffs must resonate with their origins and be produced in a manner true to their history and culture. Most importantly, everything must simply taste yummy!

### Reservation Information:
