

Dear Parents,

The CVA Home and School Association was very excited to receive the results of the initial LEGO Robotics interest survey. We are thrilled to see so many interested and supportive students and parents. Thank you for providing us with this feedback so we can continue moving forward with our planning and organization. There are several updates to make you aware of, and we so appreciate your understanding and patience as we kick off this project.

Due to a conflict with the after school gymnastics program, **we will be changing the day of the robotics club to TUESDAYS from 3:00-4:00.** We apologize for this inconvenience and confusion.

Considering the volume of interested students, we are anticipating quite a large club with many teams. The LEGO League (grades 5-8) will have 8-10 person teams, and the LEGO League Junior (grades K-4) will have 4-5 students per team.

We are looking for additional volunteers to assist with the club:

- A head coach role would require some additional planning in order to direct multiple teams.
- A team leader role would require NO planning; just show up and assist your small team in following the instructions of the head coach.

No computer expertise is needed to volunteer with the LEGO League Junior (grades K-4) teams. The LEGO League (grades 5-8) will be programming their robot, requiring some coding and computer knowledge, although not all of the supporting volunteers will need this background. If you know of any other potential volunteers, please let us know and we will contact them. Thank you so much for considering.

Registration for the club will take place the first week of school. Stay tuned for details.

Please contact Jeaneen Erickson (jeaneen_gates@hotmail.com) if you have any questions or would like to volunteer or donate. Again, thank you so much for your positive feedback. We are looking forward to this upcoming year.

Blessings,
CVA Home and School Association
