ASC Paving Established in 1998

San Antonio Professional Asphalt & Paving Company

If there's an asphalt paving project you need completed in the greater San Antonio area, ASC Paving contractor can help you! Our years of experience in southern Texas make us uniquely qualified to handle any and all types of jobs – it's what we do.

Whether it's a parking lot, a private road, driveway or any other type of paving project, our asphalt paving San Antonio TX team is the best contractor in town and we'd love to show you first-hand what we can do for you. We offer quality work at a fair and affordable price and the members of our team have been highly trained in their field.

Road Paving & Asphalt

For private roads and driveways, we use both cold and hot mixed asphalt to create something that will last you well into the future. We use the best materials we can get our hands on, and we'll work with you to plan and lay out the space. As mentioned above, we'll also work with you on a timeline for the project and stick to that to the very best of our ability.

Parking Lot Paving

Whether it's a small space for a low traffic office or a major parking lot for a shopping mall, ASC Paving has the expertise and the manpower to complete these types of jobs on time and within the agreed upon budget. These projects do take longer to plan for and require more manpower, but we'll ensure in our initial client meeting that we can adhere to your schedule and requirements. If there are any potential problems, we're always honest about this upfront so there are no broken promises or disappointments down the road.

Asphalt & Road Repairs

Whether it's potholes that need to be filled in, an old driveway that's in a state of disrepair or any other type of pavement related issue, ASC Paving can take care of these types of problems. If existing pavement can be replaced affordably and conveniently, that's always a good option. But there are times when the damage is too great and you may need to remove the existing asphalt in order to create a new surface altogether.
