

LUCIS Software Version 3.3

Release 3.3.10 - Notice (r1151) – 7/11/2018

Notices for previous releases can be found on the LUCIS Resources web page

For network users: notify your network administrator that a LUCIS Update needs to be performed if you do not have network administrative rights to update the LUCIS Software yourself.

Highlights (since release 3.3.9)

- Modified all programs to accommodate a period in the path to the LUCIS data file location
- Added additional banks to the Positive Pay export list and ability to export from saved batches
- Updated offering list for 2019
- Increased the offering remittance code to 5 digits
- Changed the license key system and protection system which improves startup speeds, particularly in Windows 10.
- Added ability to start a 30 day trial without having to contact LUCIS.
- Updated PA Close to carry a Land asset forward to the new year
- Fixed numerous minor bugs

Detail (since release 3.3.9)

LUCIS.exe (LUCIS Software Manager) – Changed the license and key management system for LUCIS Software. The new license system allows each installation of LUCIS to be separately licensed. The prior system limited users to one license per workstation. Also, new installations of LUCIS Software allow the user to choose a 30-day trial when starting LUCIS for the first time. Previously issued license keys will still be valid under the license key system. For current users, when the Register LUCIS Software window comes up, select “Retrieve Prior Version License Key” on the left and your key will be retrieved.

LUCIS.ENT – updated entity lookup table to latest Archives & Statistics list

All Programs – Added ability to handle folders with a period in the name. This allows for the use of user names with a period and the ability to use OneDrive or DropBox folders.

Donations Module:

DNORemit (DN Offering Remittance) – Remittance codes can now be five digits in length to accommodate the new NAD standard and in preparation for the Remittance module.

General Ledger Module:

GLTReconcile (GL Reconciliation) – Posting interest or fees from the Reconciliation program before any other entries have been made to the ledger now works properly. Also, added the ability to use this program for Liability accounts.

GLExport (GL Export) – Added additional banks to the positive pay file export system.

Plant Assets Module:

PAClose (PA Close) – The annual close now carries Land assets forward to the new year.
