Handwriting
- 10:45-11:45 Reading,
Phonics,
Word Study
- 11:45-12:10 Lunch
- 12:10-12:20 Read Aloud
- 12:20-1:00 English
- 1:00-1:15 P.E.
- 1:15-2:00 Social Studies
- 2:00-2:45 Science

How Great Is Our God

By Jake Marich

Our God is so great! He created everything we know and He just breathes out stars to create them. He makes everything with ease and He can do anything He wants. "Praise, oh let them praise the name of God - He spoke the word, and there they were:" Psalms 148:5.

There is so much evidence that God is real. In a galaxy hundreds of light years away, NASA took a picture of a black hole inside a galaxy. That black hole was shaped in the form of a cross—a wonderful reminder that God is present throughout the universe. And then there is laminin. This is the protein that holds our cells together. It is shaped in the form of a cross also. God marks each of our cells with a reminder of His redemptive power in our lives!

God is such a wonderful and awesome God. There is so much evidence that He exists. How can anyone doubt? Even though He can do everything and anything and is the King of kings, and Lord of lords, He still cares about us on a personal level. When we pray to Him, He hears and answers. When we feel bad, He always gives us hope and helps us feel better.

God is wonderful and loving. I marvel at His love and greatness. He can easily create worlds and galaxies. He speaks whole worlds into existence. He created the universe and everything in it, He sustains the order of all the stars and my life and yours. He was not created. He was just there forever and ever! We cannot even imagine it!

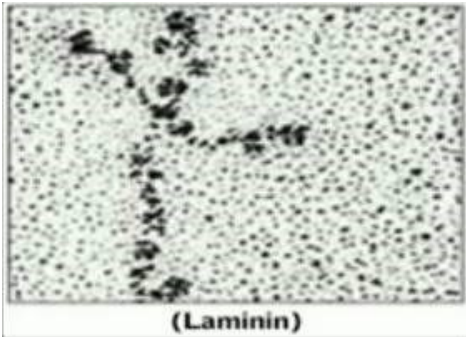

And, even before He created the earth, He had a plan in place to save us if we sinned. He envisioned His own cross before time began because we are truly special to Him. He loves us beyond words, beyond our comprehension.

God is wonderful, powerful love! He holds us in the palm of His hand!

How Great is Our God

By Noah Baksa

Our God is so great that I cannot even comprehend the majesty and glory of Him! Signs are everywhere, in the tiniest cell or the vast universe, in the center of the galaxies. The cross of Christ stands with power, love, and compassion for all. It is in every cell of our bodies.

(Laminin)

Laminin just wowed me! Is God awesome or what!

The universe is so huge that scientists can't even find the end with their best telescopes and probes. God is bigger!

We worship an indescribable, star-breathing God who has infinite power, who can create universes without lifting a finger. God has no beginning and no end. Yet, He gave His life for me! Every time I think about it, my mind just explodes with confusion, questions, and mystery! He loves me that much!!

"Sing a joyful song to the Lord, all you lands! Serve the Lord with gladness; come before His presence with singing. Know that the Lord, He is God; It is He who has made us, and not we ourselves; ...be thankful to Him and bless His name. His mercy is everlasting, and His truth endures to all generations." Psalms 100

Spiritual Moments

Students are studying creation and astronomy. God carefully planned an amazing world for us and created a universe that baffles the brightest human minds. All these wonders came into being by "The Breath of His Mouth". But, when He made you and me, He knelt in the dust and formed us with His own hands and breathed His breath into us to give us life!

How great is our God!

Home & School

Team Leaders: Eliana Alexander
Amy Marich

Our Home & School Association has arranged two fall field trips to enhance classroom studies. We visited the McMunn Planetarium on September 4 and will be going to the Kirby Center for a performance, "We The People," in October.

A Crispy Cream fundraiser is in progress at this time.

We are also excited that the men in the Home & School Association have helped move the books to the former "office" to create a proper storage room for teaching supplies, and have begun the transformation of the old library into an office. They have installed the base cabinets and are working to acquire upper cabinets. We are hoping to complete the new office space in the coming months.

Remember, if you are a parent or a constituent church member, you are a member of the Home & School Association. Come get involved! There is something for everyone to do.

Be sure to check out our website for the latest pictures and information!

P-S-S-S-T!

DID YOU KNOW...WE HAVE TWO GERBILS VISITING OUR CLASS

Ms. Baker borrowed two gerbils. We have named them Ali-A and Rhino. As we were studying creation, we researched gerbils so that we could plan a habitat for them. We found out that in the wild they live in desert areas found in Africa, India, and Asia. They love to make little tunnels and burrows and chew. They are rodents so their teeth never stop growing.

We created a great habitat for our visitors. They are fun to watch. We are trying to tame them so we can safely hold them. Ali-A lets us hold him, but Rhino still runs to his tunnels to hid when we try to hold him.

Ali-A
