Amant is pleased to announce the annual call for applications for its Studio & Research Residency Program.

Amant's 2022-2023 international studio and research residency program offers two iterations: Fall and Spring. Artists and artist duos at all stages of their careers and across a wide array of disciplines from the visual arts, literature, poetry, performance, filmmaking, and cultural theorists are encouraged to apply.

Amant Studio & Research Residency Program allows artists from around the world to spend three months in New York City to develop a specific research project that would benefit from the city's communities, resources, and vibrant art scene. The residency is self-directed and research-based, as the studios are not designed for the production or fabrication of large-scale artworks. Residents are encouraged to participate in an active dialogue with other residents and with Amant's staff, as well as

Amant

in Amant's many public programs and activities. Amant highly values and promotes cross-disciplinary conversations.

The Residency

The Amant campus features individual studios for artists coming from different disciplines and office spaces for writers, exhibition galleries, a library/reading room, a café & bookstore, and a fully outfitted performance space suitable for rehearsals and other activities. Residents also have exclusive access to a private meeting and dining area with a courtyard garden.

Residents receive round-trip economy flights to New York and airport transfers as well as a monthly expense allowance of \$3,000 US to offset the costs of accommodation, transport, and day-to-day expenses. Please be advised that the Amant studios are not residential.
