- 12/12 Thur APCS Christmas Concert
MPA Church 7:00 pm
- 12/20 Fri – 1/5 Sun Christmas Break Half Day,
School out at 12:00

DNA

This week the 7&8th graders created DNA models: double helixes complete with Adenine, Thymine, Cytosine and Guanine. DNA contains the genetic instructions for the development and function of all living things. The main role of DNA in the cell is the long-term storage of information. It is often compared to a blueprint, since it contains the instructions to construct other components of the cell, such as proteins and RNA molecules.*

Do you understand all of that? Could you replicate a DNA model? Not me! Most of us are more comfortable with the twizzler version that can be created with marshmallows and eaten! But whether we understand the intricacies of science or not, DNA is vital for all living beings. It is the very foundation of what makes us us! And the little bit that we can grasp gives us the chance to marvel at how our Creator designed us.

In Psalms 139, David says to God, *“¹³ You made all the delicate, inner parts of my body and knit them together in my mother’s womb. ¹⁴ Thank you for making me so wonderfully complex! It is amazing to think about. Your workmanship is marvelous—and how well I know it. ¹⁵ You were there while I was being formed in utter seclusion! ¹⁶ You saw me before I was born and scheduled each day of my life before I began to breathe. Every day was recorded in your book!”*

Erin Miller, Principal.

APCS CHRISTMAS CONCERT - 7:00 pm. December 12, 2019. Thursday night at the Mount Pisgah Academy Church. All our music groups will be performing. Students arrive at 6:30 pm. Concert Attire – Black pants and skirts, White Shirts and Blouses. We are so excited to share our beautiful Christmas music with you!!
