METERING

Versatile and flexible communication module

To digitise and access your meters' data, optimise your resources management and improve your energy efficiency.

## Multi-applications

Designed for communication extension for the area of mobile reading, fixed network installation and IoT projects

## Multi-fluids

Enables the remote reading of any kind of meter (water, thermal energy, gas, electricity etc.)

## Multi-protocols

Supports radio technology wM-Bus (OMS compliant) and LoRaWAN as well as input communications Pulses and wired M-Bus

# aquaradio® MultiCom

- Perfect for the remote reading of any kind of meter (water, thermal energy, gas, electricity)
- Robust housing, IP68 or IP68 reinforced
- Battery powered with a lifetime up to 16 years (depending on installation conditions and settings)
- Easy change of batteries
- Possibility to install two batteries (type D) for a higher capacity of communication

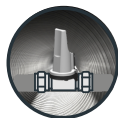

Allows communication extension for the area of mobile reading, fixed network or Internet Of Things (IoT) projects

Multi-protocol radio communication: mM-Bus and LoRaWAN® (frequency : 868MHz)

Alarms and events detection enabling complete data analysis

Compatible with installation in maintenance holes

Input communication: Pulses or wired M-Bus

## ParamApp® for Android

Download the free application on Google Play

ParamApp® uses the NFC and enables you to access a larger panel of benefits and functionalities:

- Remote display for easy access to information
- Easy data reading and configuration
- Optimized commissioning

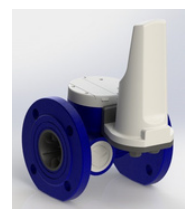

## Different mountings possible:

on a wall

on a mast

on our meters
