STOCK CHART

COMPANY DESCRIPTION

Natural Alternatives International (NAI) is a global formulator, manufacturer, and marketer of customized nutritional supplements. By combining its science-based formulations, rigorous research, natural ingredients, advanced quality assurance testing procedures, superior manufacturing and packaging capabilities, and broad marketing experience, NAI creates quality nutritional products that are sold globally. NAI generates revenues from two sources: private-label contract manufacturing services and in-house brands called CarnoSyn® and SR CarnoSyn®. Importantly, NAI branded products are backed by NAI's patent portfolio. NAI has a growth strategy focused on various organic growth initiatives, supplemented by acquisitions.

SUMMARY

- Large and expanding markets** – According to the Nutrition Business Journal, the US Dietary supplement market is large and growing. The US market is estimated at \$55B and projected to grow at a 4.6% CAGR through 2023. Furthermore, the global dietary market is estimated at \$150B and projected to grow at a CAGR of 4.6% through 2023.
- NAI's core capabilities provide a platform for organic growth** – NAI has 40 years of experience in the nutritional supplement market. NAI's core competencies includes customized product formulations; an in-house science board; scientific research and clinical studies backing its branded formulations; material acquisition and analysis expertise; a global manufacturing footprint; industry leading accreditations and certifications; a patent portfolio; and strong sales and marketing support to its customers.
- In-house brands point to growth** – NAI believes it has a significant opportunity to extend the sale of its proprietary ingredients, CarnoSyn® and SR CarnoSyn® beta-alanine into additional markets and channels. With the introduction of SR CarnoSyn®, a sustained release form of beta-alanine, NAI believes it can capture additional market share in the sports nutrition market. This is where NAI's current instant release form of beta-alanine product CarnoSyn®, is targeting an 18- to 30-year-old demographic. Importantly, NAI is also expanding SR CarnoSyn® into the health and wellness market. First, in Q318, an SR CarnoSyn® product was targeted at the 51+ year-old demographic and emphasizes how SR CarnoSyn® can provide a significant range of support for everyday wellness and healthy aging. And in June 2020, SustainedRX® was launched as a direct-to-consumer product, exclusively on Amazon. The product is marketed as a general wellness supplement.
- Additional organic growth initiatives in place** – NAI believes it is well positioned to expand its relationships with existing customers and to add new customers to its private label manufacturing activities by leveraging its global manufacturing footprint, R&D efforts, and history of execution. Additionally, NAI believes it can drive additional growth by entering new channels, such as healthcare practitioners, OTC, skin care, and specialty retail, among others.
- Acquisitions are set to supplement organic growth** – NAI is using its acquisition strategy to supplement its organic growth initiatives. NAI is looking to execute multiple accretive acquisitions generating \$10M to \$50M in sales over the next 3 years. These complementary acquisitions are expected to improve its competitive position and to enter new markets and/or channels.
- Valuation** – Based on our F22 estimates and using an EV/EBITDA multiple range of 4.5x to 8.5x to compensate for revenue concentration risk, we arrive at a valuation range of \$19.00 to \$35.00, with a mid-point of \$27.00. Additionally, if the Company continues to demonstrate further revenue and EBITDA growth, it is likely the Company could trade toward the higher end of the range. See page 8 for further details.

BUSINESS OVERVIEW

Natural Alternatives International, Inc. (NAI) is a global formulator, manufacturer, and marketer of customized nutritional supplements. The Company offers a wide range of innovative nutritional products and services to its clients. By combining its science-based formulations, rigorous research, natural ingredients, advanced quality assurance testing procedures, superior manufacturing and packaging capabilities, and broad marketing experience, NAI creates quality nutritional products.

The Company was founded in 1980 by Mark LeDoux, its current CEO. NAI's founding principles are based in the belief that natural alternatives to traditional drug therapies can assist in repairing and maintaining good health without the unwanted side effects of pharmaceuticals.

NAI is headquartered in Carlsbad, CA but has a global footprint with offices and operating centers in Europe and the U.S. The Company trades on the NASDAQ under the ticker symbol NAI.

Exhibit 1: Global Footprint

Source: Company Reports

PRODUCT OFFERINGS

NAI generates revenues from two sources: private-label contract manufacturing services and patent and trademark licensing of its in-house brands called CarnoSyn®, SR CarnoSyn® and SustainedRX®. For F21 year-end (June 2021), private label contract manufacturing represented 92% of revenue and its patent and trademark licensing was 8% of revenue.

Private-label Contract Manufacturing

NAI's primary business activity is providing private-label contract manufacturing services to companies that market and distribute vitamins, minerals, herbal and other nutritional supplements. These products are sold globally. NAI's customers market and sell its respective nutritional supplements through direct sales marketing channels, that include ecommerce channels and retail stores.

NAI's core capabilities provide an exceptional platform for strategic client partnerships and growth. First, NAI provides customized product formulations for its clients. These formulations are driven by NAI's in-house science board. Moreover, NAI has strong intellectual property backing its branded products. This includes: 11 US patents; 20 corresponding patents registered through North America, Europe, and Asia; 49

trademark registrations, including 14 in the U.S. and 35 foreign trademark registrations covering 41 countries.

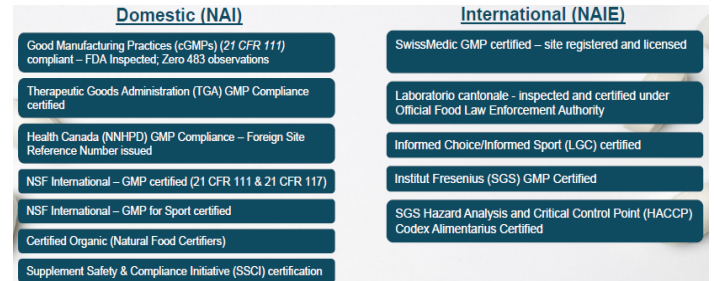

NAI also provides its customers with extensive transparency with its raw materials acquisition and analysis. This allows its customers to track raw material sourcing and screen vendors. To its clients, NAI certifies that each raw material used meets or exceeds requirements upheld by the U.S. FDA, the U.S. Pharmacopeia, the Therapeutic Goods Administration of Australia, and Prop 65, as applicable.

Next, with 40 years in the supplement market, NAI can provide its clients with a high level of manufacturing execution. NAI's manufacturing facilities are in Vista and Carlsbad, CA and Manno, Switzerland.

NAI can manufacture products in a variety of forms including capsules, tablets, chewable wafers, and powders. It also offers turnkey packaging services to provide packaging in multiple formats and labeling design.

Furthermore, NAI has industry leading accreditations and certifications that demonstrate its commitment to quality and its customers.

Exhibit 2: Industry Leading Accreditations & Certifications

Source: Company Reports

Lastly, NAI offers its clients sales and marketing support. NAI has an experienced global sales team along with a strong brand name in sports nutrition. Additionally, NAI can help provide consumer education information.

Exhibit 3: NAI's Core Capabilities

Source: Company Reports

Patent & Trademark Licensing - In-House Brands

NAI's brands include CarnoSyn®, SR CarnoSyn® and SustainedRX®. These products are backed by NAI's patent portfolio. These patents cover an ingredient known as beta-alanine. This ingredient is commercialized through the direct sale to third parties for the distribution and use of the raw material. And in June 2020, NAI launched a direct-to-consumer initiative of its SustainedRX® brand.

Exhibit 4: Beta-alanine Boosts Performance

Source: Company Reports

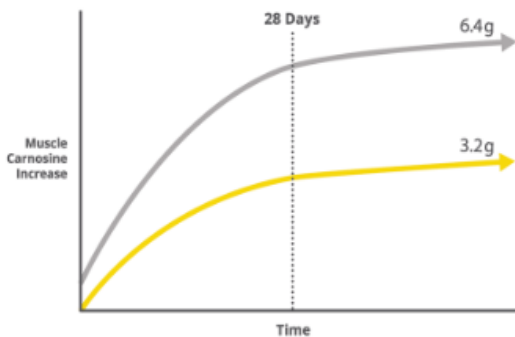

What is beta-alanine and how does it work?

Beta-alanine is a non-essential amino acid that is naturally produced by the body. Beta-alanine aids in the production of carnosine. Carnosine is a compound that plays a role in muscle endurance. Muscle endurance is an important factor in athletics and/or sporting activities.

As all muscles contain carnosine, it is believed that higher levels of carnosine may allow muscles to perform for longer periods of time before becoming fatigued and fail. Carnosine does this by regulating acid buildup (lactic acid) in the muscles that cause muscle fatigue and failure. As beta-alanine is one of carnosine's main ingredients, the use of beta-alanine supplements should boost production of carnosine and thus improve sports performance.

Studies have shown that athletes who loaded at least 90 grams of beta-alanine over 28 days saw marked improvement in performance. Furthermore, those that stepped up their intake to 179 grams over the same period, saw significantly amplified results.

Exhibit 5: Beta-alanine Boosts Performance

Source: Company Reports

CarnoSyn® is NAI's instant-release beta-alanine product marketed primarily to companies in the sports nutrition channel. The product is generally included in pre- and post-workout sports drinks. CarnoSyn® drives the majority of NAI's branded revenue.

Exhibit 6: CarnoSyn®

Source: Company Reports

SR CarnoSyn® is NAI's new, sustained release form of CarnoSyn®. SR CarnoSyn® delivers higher levels of beta-alanine in a single dose without the typical paresthesia-sensation (tingling sensation). As a result, this higher dosage and extended absorption converts to a faster increase in muscle carnosine levels to maximize athletic performance.

Exhibit 7: SR CarnoSyn®

Source: Company Reports

GROWTH STRATEGY

NAI's growth strategy is multi-pronged and focused on organic growth and acquisitions. On the organic growth side, NAI is focused on its private-label contract manufacturing activities and driving growth of CarnoSyn®, SR CarnoSyn® and SustainedRX®.

Private-label manufacturing

NAI is focused on expanding its relationships with existing customers and adding new customers to its private label manufacturing activities. It intends to drive this growth by leveraging its state-of-the-art, certified manufacturing facilities. Additionally, using its nutritional supplement education, certified manufacturing facilities, peer-reviewed clinical studies, and regulatory expertise, NAI believes it has a competitive advantage that should attract more business.

NAI also believes it can drive additional growth to its private-label manufacturing by entering new channels. The new channels include:

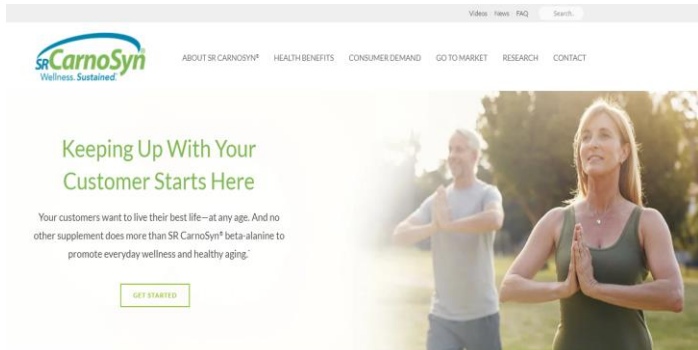

- Healthcare practitioners
- OTC
- Skin care

Patent & trademark licensing

NAI believes it has a significant opportunity to extend the sale of proprietary ingredients, CarnoSyn® and SR CarnoSyn®, into additional markets and with the introduction of new beta-alanine product offerings. Currently, most of its sales of CarnoSyn® are to companies in the sports nutrition channel and focused on the instant release form of beta-alanine. The target demographic of this market is 18-30 years old. With the introduction of SR CarnoSyn®, a sustained release form of beta-alanine, NAI believes it can capture additional market share in the sport nutrition market and drive growth outside of the sports nutrition channel.

NAI is also expanding SR CarnoSyn® into the health and wellness market. Its first expansion targeted an age category of 51+ and emphasizes how SR CarnoSyn® can provide a significant range of support for everyday wellness and healthy aging. NAI officially launched the product in Q3 2018 with a debut at the popular Supply Side West Global Exhibition.

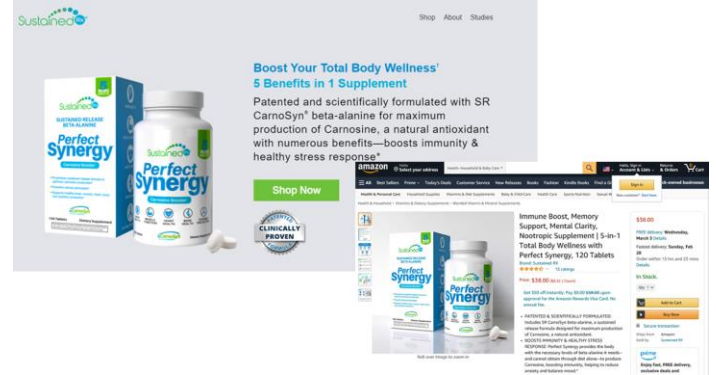

Exhibit 8: SR CarnoSyn® Website

Source: Company Reports

SustainedRX® is the newest brand launched in June 2020. The brand is marketed as providing an immunity boost, mental clarity, and total body wellness. Importantly, the product is sold directly to consumers exclusively on Amazon.

Exhibit 9: SustainedRX®

Source: Company Reports

The health and wellness market is attractive and is being driven by the aging of the world population and general consumer interest in a healthy lifestyle. According to the U.S. Census Bureau, the number of Americans age 65+ is projected to double from 49M in 2016 to 95M by 2060. Additionally, by 2060, the 65+ age group will represent almost 25% of the population, up from 15%. Furthermore, 8.5% of the worldwide population are aged 65+ and this is expected to jump to 17% by 2050 (*An Aging World: 2015; US Census Bureau & National Institute of Health*).

Additionally, according to the 2017 Supplement OTC RX Data Study, approximately 55% of consumers take supplements daily. And about 44% of consumers say supplements are part of a healthy lifestyle (*Mintel Reports: Vitamins, Minerals & Supplements US 2017*).

Lastly, NAI is using its acquisition strategy to supplement its organic growth initiatives. These include executing multiple accretive and complementary acquisitions to improve its competitive position and to enter new markets/channels. The key components of its strategy are outlined in Exhibit 10 below.

Exhibit 10: Acquisition Strategy Overview

Source: Company Reports

Given the above growth strategy, NAI has outlined its near-term and long-term financial targets. For F22, NAI expects the following:

- ✓ 7%-10% revenue growth.
- ✓ Operating margin of 10.0% to 13.0%.

For F23 and beyond, NAI is targeting the following metrics:

- ✓ Achieve \$250M revenue run rate in next 1-2 years.
- ✓ Double digit adjusted EBITDA margins.
- ✓ Target sales growth rate of 5% - 10% per year.
- ✓ Complimentary acquisitions generating \$10M to \$50M in sales over the next 3 years.

RECENT RESULTS

Sales for Q1F22 (Sept'21), decreased 3.5% to \$38.3M compared to Q1F21. Private label contract manufacturing sales decreased 9.3% Y/Y due to a 45% decrease in sales to NAI's largest customer primarily associated with the European markets. The sales decline was largely offset by increased sales to new and existing customers, including significant sales from new customers in the direct-to-consumer market. Sales backlog exceeded \$8.0M and was primarily related to supply chain and logistical constraints.

Sales from NAI's patent and trademark licensing increased 77.1% Y/Y in Q1F22. The increase was driven primarily by increased shipments to existing customers related to athletic activities and gym reopening's in-line with the easing of COVID-19 restrictions across the US, combined with sales to new customers and higher average selling prices.

SG&A expenses in Q1F22 increased 3% Y/Y primarily due to slightly higher compensation and bad debt expense, partially offset by lower patent and trademark legal expenses.

Exhibit 11: NAI Recent Results

	Q1F21	Q1F22
Net sales	39.7	38.3
Cost of goods sold	33.7	30.1
Gross profit	6.0	8.3
GPM	15.1%	21.6%
Operating Expenses		
SG&A	3.9	4.1
Income from operations	2.1	4.2
OPM	5.2%	11.0%

Source: Company Reports

NAI projects that F2022 sales will increase between 7% to 10% vs. F2021. NAI also expects operating margin to range between 10.0% to 13.0%.

RISKS

Customer concentration – NAI has a significant portion of its revenue from a relatively limited number of customers. Its largest customer, Juice Plus+ represented 51% of total sales in F21 vs 44% in F20. Additionally, there is one other private label manufacturing customer that represented 14% of sales for F21 and 21% of sales in F20. A decline in orders or loss of one of these

customers would have a significant negative impact on NAI's operations and financial results.

Beta-alanine and patent licensing – NAI owns multiple patents and trademarks related to its beta-alanine in food and nutritional supplements. A significant amount of its revenue and income for its patent & trademark segment is derived from raw material sale and patent licensing of its instant release beta-alanine, CarnoSyn®. In August 2017, 15 patents related to CarnoSyn® expired and NAI has 6 remaining patents for that version of CarnoSyn®, which begin to expire in 2026. NAI's patents related to its SR CarnoSyn® extend through 2027. The loss on any of its patents could have a significant negative impact on NAI's operations and financial results.

Extensive government regulation – Manufacturing, packaging, advertising, promotion, distribution, and sale of NAI's products are subject to regulations by numerous national and local agencies in the US and abroad. Failure to comply with government regulations may result in injunctions, product withdrawals, recalls, product seizures, fines, and criminal prosecution. Any violations or perceived violations could have a significant negative impact to operations and financial results.

Supply risks – NAI purchases its raw materials from a limited number of suppliers. In F21 one supplier represented over 10% of raw material purchases and in F19, NAI began sourcing its beta-alanine from one source in Japan. The loss of any major supplier, shortage of raw materials, or unexpected interruption of supply could adversely impact operations and financial results.

Intense competition – The market for NAI's products and those of its customers is highly competitive. Any increase in competition could result in price reductions, reduced profit margins or loss of market share.

Adverse publicity – NAI's overall business can be affected by adverse publicity or negative public perceptions about its competitors, customers, products, or industry in general. Adverse publicity could include publicity related to nutritional supplements industry in general, the efficacy, safety, and quality of nutritional supplements or ingredients used, and/or regulatory investigations. Any adverse publicity or negative public perception could have a materially adverse impact on operations and financial results.

Acquisition risks – NAI is looking to pursue acquisition as part of its growth strategy. Acquisitions involve numerous risks that include, integration difficulties, post-acquisition operational challenges, diversion of management's attention, loss of key employees, etc. Any acquisition(s) that are not successfully integrated could adversely impact operations and financial results.

Concentrated common share ownership risks – NAI's officers and directors collectively own ~ 19% of shares outstanding, of which ~16% is owned by its CEO Mark LeDoux. There can be no assurance that conflicts of interest will not arise.

VALUATION

The assumptions that drive our F22 and F23 estimates include the following:

- F22 revenue growth within management's guidance of 7% to 10%.
- F22 gross margins increase Y/Y driven by higher volumes and mix shifts.
- F22 SG&A expenses increasing at a slower pace than revenue growth.
- Above assumptions arrive at an operating margin of 10.3% in-line with NAI's guided range of 10% to 13%.
- F23 organic revenue growth of 7%, at the mid-point of NAI's long-term model of 5% - 10%.
- F23 gross margins increase slightly Y/Y driven by higher volumes.
- F23 SG&A expenses increasing at a slower pace than revenue growth.
- F23 operating margin and EBITDA margin of 11.1% and 14.2%, respectively. These compare to NAI's 5-year historical averages for operating margin and EBITDA margin of 7.1% and 9.4%, respectively.

Below we list a variety of companies that operate in the nutritional supplement market and/or wellness market.

(1) Previous day's closing price

(2) Estimates are from Capital IQ except for NAI which are Stonegate estimates

Source: Company reports, Capital IQ, Stonegate Capital Partners

Based on our F22 estimates, NAI is trading at an EV/S, EV/EBITDA, and P/E ratio of 0.5x, 3.6x, and 5.6x, respectively. This compares to comps trading at median values of 0.7x, 8.1x, and 18.5x, respectively.

We note that the comps have historically traded around a forward 8.5x EV/EBITDA multiple over the past 10 years. Given revenue concentration risks at NAI, we believe a discount to peer multiples is reasonable. As such, we believe a 20% to 25% discount is reasonable, which implies a multiple of about 6.5x.

As seen in Exhibit 13, and based on our assumptions above, we arrive at a valuation range of \$19.00 to \$35.00, with a mid-point of \$27.00. Additionally, if the Company continues to demonstrate further revenue and EBITDA growth, it is likely the Company could trade toward the higher end of the range.

CORPORATE GOVERNANCE

Management

Mark A. LeDoux, CEO – Mr. LeDoux founded Natural Alternatives International (NAI) in 1980. With over 45 years of experience since joining the nutritional supplements industry in 1975, Mr. LeDoux is considered a highly regarded leader and spokesperson for our industry – making him one of the longest serving active executives in the nutritional supplements industry. As Chairman of the Board of Directors of the prestigious Natural Products Association (NPA) based in Washington DC, where he has been a member since 1980, Mr. LeDoux represents NAI's ongoing commitment to industry and government affairs, adherence to a strong code of ethics, and continuing support in the legislative, regulatory, and public affairs arenas. He was former Chairman and Board member of the esteemed Council for Responsible Nutrition (CRN) and Founding Chairman of CRN International. LeDoux also serves on the Nutrition Industry Association-west (NIA) Board and is a recognized participant of the Codex Alimentarius Commission, the United Nations' food, and dietary supplement standard-setting body under the joint supervision of its Food and Agriculture Organization and World Health Organization. In addition, LeDoux currently serves as Chairman of the Board of Selectmen in his hometown of Hollis, New Hampshire. He is President of the Marie A. LeDoux Charitable Foundation and a current member of the Young Presidents Organization Graduates. A graduate of the Thomas Jefferson School of Law, Mr. LeDoux received his bachelor's degree from the University of Oklahoma, where he graduated with honors. He is also a graduate of Stanford University's Program for Small Business Executives.

Kenneth E. Wolf, President & COO - Mr. Wolf joined NAI in February 2008 as Chief Financial Officer, was promoted to Chief Operating Officer in June 2010 and has served as NAI's President since October 2015. Mr. Wolf is responsible for design and implementation of NAI's long-term strategic plans and oversight of all areas within the company. He possesses over 26 years of senior financial management experience in both publicly traded and privately held companies, with the prior 21 years associated with consumer products manufacturing companies.

Mr. Wolf received his Certified Public Accountant license from the State of California and a Bachelor of Science in Business Administration – Accounting from California State University in Fresno, California

Michael Fortin, CFO – Mr. Fortin joined NAI in April 2008 as Director of Accounting and SEC Reporting and earned his appointment to Chief Financial Officer in October 2015. With over 18 years of accounting and finance experience working in Big 4 public accounting and private industry, Mr. Fortin is a steadfast, strategic leader responsible for driving financial and business results.

Mr. Fortin received his Certified Public Accountant license from the State of California and a Bachelor of Science in Business Administration-Accounting from San Diego State University, California.

Board of Directors

IMPORTANT DISCLOSURES AND DISCLAIMERS

The following disclosures are related to Stonegate Capital Partners (SCP) research reports.

The information used for the creation of this report has been obtained from sources we considered to be reliable, but we can neither guarantee nor represent the completeness or accuracy of the information herewith. Such information and the opinions expressed are subject to change without notice and SCP does not undertake to advise you of any such changes. In preparing this research report, SCP analysts obtain information from a variety of sources, including to but not limited to, the issuing Company, a variety of outside sources, public filings, the principals of SCP and outside consultants. SCP and its analyst may engage outside contractors with the preparation of this report. The information contained in this report by the SCP analyst is believed to be factual, but we can neither guarantee nor represent the completeness or accuracy of the information herewith. While SCP endeavors to update the information contained herein on a reasonable basis, there may be regulatory, compliance, or other reasons that prevent us from doing so. The opinions or information expressed are believed to be accurate as of the date of this report; no subsequent publication or distribution of this report shall mean or imply that any such opinions or information remains current at any time after the date of this report. Reproduction or redistribution of this report without the expressed written consent of SCP is prohibited. Additional information on any securities mentioned is available on request. SCP does not rate the securities covered in its research. SCP does not have, nor has previously had, a rating for any securities of the Company. SCP does not have a price target for any securities of the Company.

Recipients of this report who are not market professionals or institutional investors should seek the advice of their independent financial advisor prior to making any investment decision based on this report or for any necessary explanation of its contents. Because the objectives of individual clients may vary, this report is not to be construed as an offer or the solicitation of an offer to sell or buy the securities herein mentioned. This report is the independent work of SCP and is not to be construed as having been issued by, or in any way endorsed or guaranteed by, any issuing companies of the securities mentioned herein.

SCP does not provide, nor has it received compensation for investment banking services on the securities covered in this report. SCP does not expect to receive compensation for investment banking services on the securities covered in this report. SCP has a non-exclusive Advisory Services agreement to provide research coverage, retail and institutional awareness, and overall Investor Relations support and for which it is compensated \$3,000 per month. SCP's equity affiliate, Stonegate Capital Markets (SCM) - member FINRA/SIPC - may seek to provide investment banking services on the securities covered in this report for which it could be compensated.

SCP Analysts are restricted from holding or trading securities in the issuers which they cover. Research Analyst and/or a member of the Analyst's household do not own shares of this security. Research Analyst, employees of SCP, and/or a member of the Analyst's household do not serve as an officer, director, or advisory board member of the Company. SCP and SCM do not make a market in any security, nor do they act as dealers in securities.

SCP Analysts are paid in part based on the overall profitability of SCP and SCM. Such profitability is derived from a variety of sources and includes payments received from issuers of securities covered by SCP for services described above. No part of Analyst compensation was, is or will be, directly or indirectly, related to the specific recommendations or views expressed in any report or article. This security is eligible for sale in one or more states. This security may be subject to the Securities and Exchange Commission's Penny Stock Rules, which may set forth sales practice requirements for certain low-priced securities.
