### Winter Retreat

You are invited to join our church in McCall at Camp Ida-Haven from Jan. 31—Feb. 2

Each year we go enjoy the snow and the McCall Winter festival and have our church service up there. Great food, great fun and fellowship! You can join us for our services or just do your own thing.

Sign up sheet and prices are on the Elementary School sign in board.....

**Hot Lunch—\$4**

Tuesday—Pizza      Thursday—Mac & Cheese

# Classroom News

## Mrs. Davidson's Class

Happy New Year! I hope this year is off to a good start for your family. The first half of the school year ends today, if you can believe it. We started new Reading units this week, with the overall theme being Friends and Family. We are continuing with volleyball in PE class, and will be starting Science next week.

Ski Days will start later this month, and forms are due today. This is for the grades 3-8 Lifesports Program at Bogus Basin. First graders and any others not participating in skiing will have other activities planned for those days, probably ice skating.

Have a great weekend!

## Teacher Martha's Class

Our first week back has been great! Aside from a bit of bedtime woes we were ready to return to normal life. The kids have been great this week as they reunite with their friends.

January is a big turning point for our class. We are starting to take learning to the next level. The first part of the year is the basic, ABC sounds and recognition, numbers recognition and counting. Now, we are learning letter formations correctly, writing them in the correct way, starting our reading program, building words, etc. In math we are working on counting by 2's this week. The kids have 1-20 down pretty good, and now we will keep working our way to 100.

We added a laptop to the take apart table. This is a favorite for the boys. They love to see the insides of the machines and how they work. In the laptop they found a small remote! They had taken apart the keyboard so we don't know what buttons correlated, but it was a fun find! Now they want to take apart a big computer and see if there is a remote in that too! Exploring is so important...just as important as the ABC and 123.

Our story is about Baby Moses and so we have been looking at babies, looked at our own baby pictures.

## Teacher Holly's Class

Can't believe it's already 2020!! We're almost half way through the school year. This is the time where I get to see light bulbs come. The various concepts I've introduced earlier are starting to make sense.

We are learning about frogs. It started as a math activity and turned into matching, painting and large motor learning opportunities.

We are going to see how music affects our painting. Will listening to calm music look different than something with a faster tempo?
