

Monitor and Control Your Pivots Remotely.

Reinke's RC10 Remote Management Device puts the power of efficiency and productivity in the palm of your hand. Powered by Reinke's ReinCloud™ ag-data service, RC10 is easy to operate, maintain and works on nearly every pivot irrigation around. RC10 is the advantage you need to get the most out of your irrigation system.

RC10 Remote Management Advantages

ADVANCED CONTROL

Options for sector programming in both forward and reverse functions, end gun and auxiliary programming and more.

COVERAGE

For those hard to reach fields, RC10 provides options for satellite connectivity when cellular isn't available.

PATENTED, DOUBLE-WALL TOWER BOX

RC10 uses Reinke's exclusive double-walled tower box providing a moisture-free environment for the components.

REINCLOUD READY

Powered by ReinCloud™ ag-data services, easily access your dashboard through any internet enabled device.

BUILT TO LAST

For season after season of reliable service.

COMPATIBILITY

Integrates seamlessly with nearly all pivot irrigation system brands.
