

FIRE PROTECTION INSTRUCTIONS

Slettheiveien 53

SAVE: Evacuate the building. Help children and elderly/disabled residents. Do not use the elevators, only the stairs.

ALERT: If you detect fire or smoke, call the fire department at once. Warn your closest neighbors by knocking and ringing the doors. Warn the rest of the residents through the calling system at the entrance. Make sure to specify which unit is on fire.

Call the fire department, phone number 110.
Specify the correct address: Slettheiveien 53.

EXTINGUISH: In case of a small fire, try to put it out with available extinguishing equipment. Do not put yourself or others in any danger, evacuate if the fire is too big.

EVACUATE: Fire meeting point is:
Lower parking lot, closer to building 49.

Close all doors and windows. If the fire is not extinguished at once, make sure to close all doors to the area, including corridor separators and stairwell doors, to prevent the fire from spreading. The first person stops the elevators by pushing the button in the red box located on both elevators on ground floor.

If fire and/or smoke is obstructing the escape route through the stairwell, return to your apartment and notify the fire department of where you are. Never use the elevators.

Make sure to know:

- Escape routes and fire meeting points.
- Where fire extinguishers are located.
- How to use the fire extinguishing equipment.

Emergency exits and stairwell should always be accessible, do not keep your personal belongings there. Always keep the fire doors closed.

Tell everyone in your unit how to act in the event of fire.
