Classroom News

Mrs. Davidson's Class

Thank you to all the parents who came for Student/Parent/Teacher conferences this week! What a blessing to have you all so involved and dedicated to the education of your children. I am so proud of all of my students, and look forward to their continued improvement and success as they grow in knowledge and in God's grace.

Thanks also to those who came to our farm themed Fall Back Party last Saturday night. What a fun evening - and a great way to welcome in the time change!

This week we started our new Bible unit about the good kings of Israel and Judah, specifically Hezekiah and Jehoshaphat. The students did an activity to compare, from the Bible, the number of good kings to bad kings and found there were quite a few more bad kings. They already know from studying Elijah how wicked Ahab was, and were interested to see that he was used as a benchmark for several other kings, who the Bible says were as wicked or even more wicked than he was! This unit will focus on the characteristics of the good kings, and we will see how we can apply those characteristics to our own lives. So far we have learned that it is important to look to God for wisdom, counsel, and help, especially when faced with an important decision.

In PE we have been working on our rope jumping skills. The students have practiced individual jumping, jumping with a long rope and two turners, and even learned some tricks to do by themselves or with partners. Jumping rope requires a lot of coordination and rhythm, so younger students should continue to practice until they master it. The tricks are both challenging and fun, and require even more advanced skills for those who have mastered basic jumping and turning.

Teacher Martha's Class

This week we started the story of creation. Our God had so much fun making our world. Unlimited colors, ideas imagination were available for him to use. We get to see all of that beauty each day. During our morning worship, we have looked at different animals he made. He added some amazing features to them and such detail within our world.

The Kindergartners have started their handwriting/phonic books this week. They are getting use to having lines to follow as they practice their letters. This week we studied in depth the letters, M, S, T, C, P & A. On Friday, we started writing and reading words...cat, cap, mat and map. Next week we should be sending home little readers for them to practice sounding out their words.

While the Kindergartners have been doing their handwriting, the preK's have been working on putting their letters in order. They are doing good at singing the ABC song to figure out what comes next. They have been working very well together to identify the needed letter.

We have been practicing for our Christmas program. We have a new song and you're going to love it!

Teacher Holly's Class

I am excited to report that the concept of being "A bucket Filler" has finally become concrete as my little people put beads in their very own bucket for being helpful, kind, following directions, laying quiet/napping, have a cheerful good bye to parents, and my all time favorite is when they tell me something good about another student.

Please bring a family photo to put on our our bulletin board in the hall. Thank you to those who already have.

The target letters are M,D,S,T,O. We have been working on my these many different ways. Musical letters, hokey pokey (put your M in, put your M out...), matching and tracing. Some thing I never thought of before is "Teacher Holly has a class, E-I-E-I-O, and in this class she has a M...)

The children where experimenting with magnets, so I have placed items for them to see if they are metal or not. They have even built "robots" with the items in the bucket.

Math has been about number lines and a variation of BINGO. As always, those that know their numbers are eager to help the others.

I have a room full of fun, loving, caring children. Now, if I can only channel all that energy!!! :)

They already know from studying Elijah how wicked Ahab was, and were interested to see that he was used as a benchmark for several other kings, who the Bible says were as wicked or even more wicked than he was! This unit will focus on the characteristics of the good kings, and we will see how we can apply those characteristics to our own lives. So far we have learned that it is important to look to God for wisdom, counsel, and help, especially when faced with an important decision.

In PE we have been working on our rope jumping skills. The students have practiced individual jumping, jumping with a long rope and two turners, and even learned some tricks to do by themselves or with partners. Jumping rope requires a lot of coordination and rhythm, so younger students should continue to practice until they master it. The tricks are both challenging and fun, and require even more advanced skills for those who have mastered basic jumping and turning.

Teacher Martha's Class

This week we started the story of creation. Our God had so much fun making our world. Unlimited colors, ideas imagination were available for him to use. We get to see all of that beauty each day. During our morning worship, we have looked at different animals he made. He added some amazing features to them and such detail within our world.

The Kindergartners have started their handwriting/phonic books this week. They are getting use to having lines to follow as they practice their letters. This week we studied in depth the letters, M, S, T, C, P & A. On Friday, we started writing and reading words...cat, cap, mat and map. Next week we should be sending home little readers for them to practice sounding out their words.

While the Kindergartners have been doing their handwriting, the preK's have been working on putting their letters in order. They are doing good at singing the ABC song to figure out what comes next. They have been working very well together to identify the needed letter.

We have been practicing for our Christmas program. We have a new song and you're going to love it!

Teacher Holly's Class

I am excited to report that the concept of being "A bucket Filler" has finally become concrete as my little people put beads in their very own bucket for being helpful, kind, following directions, laying quiet/napping, have a cheerful good bye to parents, and my all time favorite is when they tell me something good about another student.

Please bring a family photo to put on our our bulletin board in the hall. Thank you to those who already have.

The target letters are M,D,S,T,O. We have been working on my these many different ways. Musical letters, hokey pokey (put your M in, put your M out...), matching and tracing. Some thing I never thought of before is "Teacher Holly has a class, E-I-E-I-O, and in this class she has a M...)

The children where experimenting with magnets, so I have placed items for them to see if they are metal or not. They have even built "robots" with the items in the bucket.

Math has been about number lines and a variation of BINGO. As always, those that know their numbers are eager to help the others.

I have a room full of fun, loving, caring children. Now, if I can only channel all that energy!!! :)

Thank you to all the parents who came for Student/Parent/Teacher conferences this week! What a blessing to have you all so involved and dedicated to the education of your children. I am so proud of all of my students, and look forward to their continued improvement and success as they grow in knowledge and in God's grace.

Thanks also to those who came to our farm themed Fall Back Party last Saturday night. What a fun evening - and a great way to welcome in the time change!

This week we started our new Bible unit about the good kings of Israel and Judah, specifically Hezekiah and Jehoshaphat. The students did an activity to compare, from the Bible, the number of good kings to bad kings and found there were quite a few more bad kings. They already know from studying Elijah how wicked Ahab was, and were interested to see that he was used as a benchmark for several other kings, who the Bible says were as wicked or even more wicked than he was! This unit will focus on the characteristics of the good kings, and we will see how we can apply those characteristics to our own lives. Thank you to all the parents who came for Student/Parent/Teacher conferences this week! What a blessing to have you all so involved and dedicated to the education of your children. I am so proud of all of my students, and look forward to their continued improvement and success as they grow in knowledge and in God's grace.

Thanks also to those who came to our farm themed Fall Back Party last Saturday night. What a fun evening - and a great way to welcome in the time change!

This week we started our new Bible unit about the good kings of Israel and Judah, specifically Hezekiah and Jehoshaphat. The students did an activity to compare, from the Bible, the number of good kings to bad kings and found there were quite a few more bad kings. They already know from studying Elijah how wicked Ahab was, and were interested to see that he was used as a benchmark for several other kings, who the Bible says were as wicked or even more wicked than he was! This unit will focus on the characteristics of the good kings, and we will see how we can apply those characteristics to our own lives. So far we have learned that it is important to look to God for wisdom, counsel, and help, especially when faced with an important decision.

In PE we have been working on our rope jumping skills. The students have practiced individual jumping, jumping with a long rope and two turners, and even learned some tricks to do by themselves or with partners. Jumping rope requires a lot of coordination and rhythm, so younger students should continue to practice until they master it. The tricks are both challenging and fun, and require even more advanced skills for those who have mastered basic jumping and turning.

Teacher Martha's Class

This week we started the story of creation. Our God had so much fun making our world. Unlimited colors, ideas imagination were available for him to use. We get to see all of that beauty each day. During our morning worship, we have looked at different animals he made. He added some amazing features to them and such detail within our world.

The Kindergartners have started their handwriting/phonic books this week. They are getting use to having lines to follow as they practice their letters. This week we studied in depth the letters, M, S, T, C, P & A. On Friday, we started writing and reading words...cat, cap, mat and map. Next week we should be sending home little readers for them to practice sounding out their words.

While the Kindergartners have been doing their handwriting, the preK's have been working on putting their letters in order. They are doing good at singing the ABC song to figure out what comes next. They have been working very well together to identify the needed letter.

We have been practicing for our Christmas program. We have a new song and you're going to love it!

Teacher Holly's Class

I am excited to report that the concept of being "A bucket Filler" has finally become concrete as my little people put beads in their very own bucket for being helpful, kind, following directions, laying quiet/napping, have a cheerful good bye to parents, and my all time favorite is when they tell me something good about another student.

Please bring a family photo to put on our our bulletin board in the hall. Thank you to those who already have.

The target letters are M,D,S,T,O. We have been working on my these many different ways. Musical letters, hokey pokey (put your M in, put your M out...), matching and tracing. Some thing I never thought of before is "Teacher Holly has a class, E-I-E-I-O, and in this class she has a M...)

The children where experimenting with magnets, so I have placed items for them to see if they are metal or not. They have even built "robots" with the items in the bucket.

Math has been about number lines and a variation of BINGO. As always, those that know their numbers are eager to help the others.

I have a room full of fun, loving, caring children. Now, if I can only channel all that energy!!! :)

Please bring a family photo to put on our our bulletin board in the hall. Thank you to those who already have.

The target letters are M,D,S,T,O. We have been working on my these many different ways. Musical letters, hokey pokey (put your M in, put your M out...), matching and tracing. Some thing I never thought of before is "Teacher Holly has a class, E-I-E-I-O, and in this class she has a M...)

The children where experimenting with magnets, so I have placed items for them to see if they are metal or not. They have even built "robots" with the items in the bucket.

Math has been about number lines and a variation of BINGO. As always, those that know their numbers are eager to help the others.

I have a room full of fun, loving, caring children. Now, if I can only channel all that energy!!! :)

Classroom News

Mrs. Davidson's Class

Thank you to all the parents who came for Student/Parent/Teacher conferences this week! What a blessing to have you all so involved and dedicated to the education of your children. I am so proud of all of my students, and look forward to their continued improvement and success as they grow in knowledge and in God's grace.

Thanks also to those who came to our farm themed Fall Back Party last Saturday night. What a fun evening - and a great way to welcome in the time change!

This week we started our new Bible unit about the good kings of Israel and Judah, specifically Hezekiah and Jehoshaphat. The students did an activity to compare, from the Bible, the number of good kings to bad kings and found there were quite a few more bad kings. They already know from studying Elijah how wicked Ahab was, and were interested to see that he was used as a benchmark for several other kings, who the Bible says were as wicked or even more wicked than he was! This unit will focus on the characteristics of the good kings, and we will see how we can apply those characteristics to our own lives. So far we have learned that it is important to look to God for wisdom, counsel, and help, especially when faced with an important decision.

In PE we have been working on our rope jumping skills. The students have practiced individual jumping, jumping with a long rope and two turners, and even learned some tricks to do by themselves or with partners. Jumping rope requires a lot of coordination and rhythm, so younger students should continue to practice until they master it. The tricks are both challenging and fun, and require even more advanced skills for those who have mastered basic jumping and turning.

Teacher Martha's Class

This week we started the story of creation. Our God had so much fun making our world. Unlimited colors, ideas imagination were available for him to use. We get to see all of that beauty each day. During our morning worship, we have looked at different animals he made. He added some amazing features to them and such detail within our world.

The Kindergartners have started their handwriting/phonic books this week. They are getting use to having lines to follow as they practice their letters. This week we studied in depth the letters, M, S, T, C, P & A. On Friday, we started writing and reading words...cat, cap, mat and map. Next week we should be sending home little readers for them to practice sounding out their words.

While the Kindergartners have been doing their handwriting, the preK's have been working on putting their letters in order. They are doing good at singing the ABC song to figure out what comes next. They have been working very well together to identify the needed letter.

We have been practicing for our Christmas program. We have a new song and you're going to love it!

Teacher Holly's Class

I am excited to report that the concept of being "A bucket Filler" has finally become concrete as my little people put beads in their very own bucket for being helpful, kind, following directions, laying quiet/napping, have a cheerful good bye to parents, and my all time favorite is when they tell me something good about another student.

Please bring a family photo to put on our our bulletin board in the hall. Thank you to those who already have.

Next week we should be sending home little readers for them to practice sounding out their words.

While the Kindergartners have been doing their handwriting, the preK's have been working on putting their letters in order. They are doing good at singing the ABC song to figure out what comes next. They have been working very well together to identify the needed letter.

We have been practicing for our Christmas program. We have a new song and you're going to love it!

Teacher Holly's Class

I am excited to report that the concept of being "A bucket Filler" has finally become concrete as my little people put beads in their very own bucket for being helpful, kind, following directions, laying quiet/napping, have a cheerful good bye to parents, and my all time favorite is when they tell me something good about another student.

Please bring a family photo to put on our our bulletin board in the hall. Thank you to those who already have.

The target letters are M,D,S,T,O. We have been working on my these many different ways. Musical letters, hokey pokey (put your M in, put your M out...), matching and tracing. Some thing I never thought of before is "Teacher Holly has a class, E-I-E-I-O, and in this class she has a M...)

The children where experimenting with magnets, so I have placed items for them to see if they are metal or not. They have even built "robots" with the items in the bucket.

Math has been about number lines and a variation of BINGO. As always, those that know their numbers are eager to help the others.

I have a room full of fun, loving, caring children. Now, if I can only channel all that energy!!! :)

Classroom News

Mrs. Davidson's Class

Thank you to all the parents who came for Student/Parent/Teacher conferences this week! What a blessing to have you all so involved and dedicated to the education of your children. I am so proud of all of my students, and look forward to their continued improvement and success as they grow in knowledge and in God's grace.

Thanks also to those who came to our farm themed Fall Back Party last Saturday night. What a fun evening - and a great way to welcome in the time change!

This week we started our new Bible unit about the good kings of Israel and Judah, specifically Hezekiah and Jehoshaphat. The students did an activity to compare, from the Bible, the number of good kings to bad kings and found there were quite a few more bad kings. They already know from studying Elijah how wicked Ahab was, and were interested to see that he was used as a benchmark for several other kings, who the Bible says were as wicked or even more wicked than he was! This unit will focus on the characteristics of the good kings, and we will see how we can apply those characteristics to our own lives. So far we have learned that it is important to look to God for wisdom, counsel, and help, especially when faced with an important decision.

In PE we have been working on our rope jumping skills. The students have practiced individual jumping, jumping with a long rope and two turners, and even learned some tricks to do by themselves or with partners. Jumping rope requires a lot of coordination and rhythm, so younger students should continue to practice until they master it. The tricks are both challenging and fun, and require even more advanced skills for those who have mastered basic jumping and turning.

Teacher Martha's Class

This week we started the story of creation. Our God had so much fun making our world. Unlimited colors, ideas imagination were available for him to use. We get to see all of that beauty each day. During our morning worship, we have looked at different animals he made. He added some amazing features to them and such detail within our world.

The Kindergartners have started their handwriting/phonic books this week. They are getting use to having lines to follow as they practice their letters. This week we studied in depth the letters, M, S, T, C, P & A. On Friday, we started writing and reading words...cat, cap, mat and map. Next week we should be sending home little readers for them to practice sounding out their words.

Teacher Martha's Class

This week we started the story of creation. Our God had so much fun making our world. Unlimited colors, ideas imagination were available for him to use. We get to see all of that beauty each day. During our morning worship, we have looked at different animals he made. He added some amazing features to them and such detail within our world.

The Kindergartners have started their handwriting/phonic books this week. They are getting use to having lines to follow as they practice their letters. This week we studied in depth the letters, M, S, T, C, P & A. On Friday, we started writing and reading words...cat, cap, mat and map. Next week we should be sending home little readers for them to practice sounding out their words.

While the Kindergartners have been doing their handwriting, the preK's have been working on putting their letters in order. They are doing good at singing the ABC song to figure out what comes next. They have been working very well together to identify the needed letter.

We have been practicing for our Christmas program. We have a new song and you're going to love it!

Teacher Holly's Class

I am excited to report that the concept of being "A bucket Filler" has finally become concrete as my little people put beads in their very own bucket for being helpful, kind, following directions, laying quiet/napping, have a cheerful good bye to parents, and my all time favorite is when they tell me something good about another student.

Please bring a family photo to put on our our bulletin board in the hall. Thank you to those who already have.

The target letters are M,D,S,T,O. We have been working on my these many different ways. Musical letters, hokey pokey (put your M in, put your M out...), matching and tracing. Some thing I never thought of before is "Teacher Holly has a class, E-I-E-I-O, and in this class she has a M...)

The children where experimenting with magnets, so I have placed items for them to see if they are metal or not. They have even built "robots" with the items in the bucket.

Math has been about number lines and a variation of BINGO. As always, those that know their numbers are eager to help the others.

I have a room full of fun, loving, caring children. Now, if I can only channel all that energy!!! :)

Classroom News

Mrs. Davidson's Class

Thank you to all the parents who came for Student/Parent/Teacher conferences this week! What a blessing to have you all so involved and dedicated to the education of your children. I am so proud of all of my students, and look forward to their continued improvement and success as they grow in knowledge and in God's grace.

Thanks also to those who came to our farm themed Fall Back Party last Saturday night. What a fun evening - and a great way to welcome in the time change!

This week we started our new Bible unit about the good kings of Israel and Judah, specifically Hezekiah and Jehoshaphat. The students did an activity to compare, from the Bible, the number of good kings to bad kings and found there were quite a few more bad kings. They already know from studying Elijah how wicked Ahab was, and were interested to see that he was used as a benchmark for several other kings, who the Bible says were as wicked or even more wicked than he was! This unit will focus on the characteristics of the good kings, and we will see how we can apply those characteristics to our own lives. So far we have learned that it is important to look to God for wisdom, counsel, and help, especially when faced with an important decision.

In PE we have been working on our rope jumping skills. The students have practiced individual jumping, jumping with a long rope and two turners, and even learned some tricks to do by themselves or with partners. Jumping rope requires a lot of coordination and rhythm, so younger students should continue to practice until they master it. The tricks are both challenging and fun, and require even more advanced skills for those who have mastered basic jumping and turning.

This unit will focus on the characteristics of the good kings, and we will see how we can apply those characteristics to our own lives. So far we have learned that it is important to look to God for wisdom, counsel, and help, especially when faced with an important decision.

In PE we have been working on our rope jumping skills. The students have practiced individual jumping, jumping with a long rope and two turners, and even learned some tricks to do by themselves or with partners. Jumping rope requires a lot of coordination and rhythm, so younger students should continue to practice until they master it. The tricks are both challenging and fun, and require even more advanced skills for those who have mastered basic jumping and turning.

Teacher Martha's Class

This week we started the story of creation. Our God had so much fun making our world. Unlimited colors, ideas imagination were available for him to use. We get to see all of that beauty each day. During our morning worship, we have looked at different animals he made. He added some amazing features to them and such detail within our world.

The Kindergartners have started their handwriting/phonic books this week. They are getting use to having lines to follow as they practice their letters. This week we studied in depth the letters, M, S, T, C, P & A. On Friday, we started writing and reading words...cat, cap, mat and map. Next week we should be sending home little readers for them to practice sounding out their words.

While the Kindergartners have been doing their handwriting, the preK's have been working on putting their letters in order. They are doing good at singing the ABC song to figure out what comes next. They have been working very well together to identify the needed letter.

We have been practicing for our Christmas program. We have a new song and you're going to love it!

Teacher Holly's Class

I am excited to report that the concept of being "A bucket Filler" has finally become concrete as my little people put beads in their very own bucket for being helpful, kind, following directions, laying quiet/napping, have a cheerful good bye to parents, and my all time favorite is when they tell me something good about another student.

Please bring a family photo to put on our our bulletin board in the hall. Thank you to those who already have.

The target letters are M,D,S,T,O. We have been working on my these many different ways. Musical letters, hokey pokey (put your M in, put your M out...), matching and tracing. Some thing I never thought of before is "Teacher Holly has a class, E-I-E-I-O, and in this class she has a M...)

The children where experimenting with magnets, so I have placed items for them to see if they are metal or not. They have even built "robots" with the items in the bucket.

Math has been about number lines and a variation of BINGO. As always, those that know their numbers are eager to help the others.

I have a room full of fun, loving, caring children. Now, if I can only channel all that energy!!! :)

Mrs. Davidson's Class

Thank you to all the parents who came for Student/Parent/Teacher conferences this week! What a blessing to have you all so involved and dedicated to the education of your children. I am so proud of all of my students, and look forward to their continued improvement and success as they grow in knowledge and in God's grace.

Thanks also to those who came to our farm themed Fall Back Party last Saturday night. What a fun evening - and a great way to welcome in the time change!

This week we started our new Bible unit about the good kings of Israel and Judah, specifically Hezekiah and Jehoshaphat. The students did an activity to compare, from the Bible, the number of good kings to bad kings and found there were quite a few more bad kings. They already know from studying Elijah how wicked Ahab was, and were interested to see that he was used as a benchmark for several other kings, who the Bible says were as wicked or even more wicked than he was! This unit will focus on the characteristics of the good kings, and we will see how we can apply those characteristics to our own lives. So far we have learned that it is important to look to God for wisdom, counsel, and help, especially when faced with an important decision.

I am so proud of all of my students, and look forward to their continued improvement and success as they grow in knowledge and in God's grace.

Thanks also to those who came to our farm themed Fall Back Party last Saturday night. What a fun evening - and a great way to welcome in the time change!

This week we started our new Bible unit about the good kings of Israel and Judah, specifically Hezekiah and Jehoshaphat. The students did an activity to compare, from the Bible, the number of good kings to bad kings and found there were quite a few more bad kings. They already know from studying Elijah how wicked Ahab was, and were interested to see that he was used as a benchmark for several other kings, who the Bible says were as wicked or even more wicked than he was! This unit will focus on the characteristics of the good kings, and we will see how we can apply those characteristics to our own lives. So far we have learned that it is important to look to God for wisdom, counsel, and help, especially when faced with an important decision.

In PE we have been working on our rope jumping skills. The students have practiced individual jumping, jumping with a long rope and two turners, and even learned some tricks to do by themselves or with partners. Jumping rope requires a lot of coordination and rhythm, so younger students should continue to practice until they master it. The tricks are both challenging and fun, and require even more advanced skills for those who have mastered basic jumping and turning.

Teacher Martha's Class

This week we started the story of creation. Our God had so much fun making our world. Unlimited colors, ideas imagination were available for him to use. We get to see all of that beauty each day. During our morning worship, we have looked at different animals he made. He added some amazing features to them and such detail within our world.

The Kindergartners have started their handwriting/phonic books this week. They are getting use to having lines to follow as they practice their letters. This week we studied in depth the letters, M, S, T, C, P & A. On Friday, we started writing and reading words...cat, cap, mat and map. Next week we should be sending home little readers for them to practice sounding out their words.

While the Kindergartners have been doing their handwriting, the preK's have been working on putting their letters in order. They are doing good at singing the ABC song to figure out what comes next. They have been working very well together to identify the needed letter.

We have been practicing for our Christmas program. We have a new song and you're going to love it!

Teacher Holly's Class

I am excited to report that the concept of being "A bucket Filler" has finally become concrete as my little people put beads in their very own bucket for being helpful, kind, following directions, laying quiet/napping, have a cheerful good bye to parents, and my all time favorite is when they tell me something good about another student.

Please bring a family photo to put on our our bulletin board in the hall. Thank you to those who already have.

The target letters are M,D,S,T,O. We have been working on my these many different ways. Musical letters, hokey pokey (put your M in, put your M out...), matching and tracing. Some thing I never thought of before is "Teacher Holly has a class, E-I-E-I-O, and in this class she has a M...)

The children where experimenting with magnets, so I have placed items for them to see if they are metal or not. They have even built "robots" with the items in the bucket.

Math has been about number lines and a variation of BINGO. As always, those that know their numbers are eager to help the others.

I have a room full of fun, loving, caring children. Now, if I can only channel all that energy!!! :)

The target letters are M,D,S,T,O. We have been working on my these many different ways. Musical letters, hokey pokey (put your M in, put your M out...), matching and tracing. Some thing I never thought of before is "Teacher Holly has a class, E-I-E-I-O, and in this class she has a M...)

The children where experimenting with magnets, so I have placed items for them to see if they are metal or not. They have even built "robots" with the items in the bucket.

Math has been about number lines and a variation of BINGO. As always, those that know their numbers are eager to help the others.

I have a room full of fun, loving, caring children. Now, if I can only channel all that energy!!! :)

Classroom News

Mrs. Davidson's Class

Thank you to all the parents who came for Student/Parent/Teacher conferences this week! What a blessing to have you all so involved and dedicated to the education of your children. I am so proud of all of my students, and look forward to their continued improvement and success as they grow in knowledge and in God's grace.

Thanks also to those who came to our farm themed Fall Back Party last Saturday night. What a fun evening - and a great way to welcome in the time change!

This week we started our new Bible unit about the good kings of Israel and Judah, specifically Hezekiah and Jehoshaphat. The students did an activity to compare, from the Bible, the number of good kings to bad kings and found there were quite a few more bad kings. They already know from studying Elijah how wicked Ahab was, and were interested to see that he was used as a benchmark for several other kings, who the Bible says were as wicked or even more wicked than he was! This unit will focus on the characteristics of the good kings, and we will see how we can apply those characteristics to our own lives. So far we have learned that it is important to look to God for wisdom, counsel, and help, especially when faced with an important decision.

In PE we have been working on our rope jumping skills. The students have practiced individual jumping, jumping with a long rope and two turners, and even learned some tricks to do by themselves or with partners. Jumping rope requires a lot of coordination and rhythm, so younger students should continue to practice until they master it. The tricks are both challenging and fun, and require even more advanced skills for those who have mastered basic jumping and turning.

Teacher Martha's Class

This week we started the story of creation. Our God had so much fun making our world. Unlimited colors, ideas imagination were available for him to use. We get to see all of that beauty each day. During our morning worship, we have looked at different animals he made. He added some amazing features to them and such detail within our world.

The Kindergartners have started their handwriting/phonic books this week. They are getting use to having lines to follow as they practice their letters. This week we studied in depth the letters, M, S, T, C, P & A. On Friday, we started writing and reading words...cat, cap, mat and map. Next week we should be sending home little readers for them to practice sounding out their words.

While the Kindergartners have been doing their handwriting, the preK's have been working on putting their letters in order. They are doing good at singing the ABC song to figure out what comes next. They have been working very well together to identify the needed letter.

We have been practicing for our Christmas program. We have a new song and you're going to love it!

Teacher Holly's Class

I am excited to report that the concept of being "A bucket Filler" has finally become concrete as my little people put beads in their very own bucket for being helpful, kind, following directions, laying quiet/napping, have a cheerful good bye to parents, and my all time favorite is when they tell me something good about another student.

Please bring a family photo to put on our our bulletin board in the hall. Thank you to those who already have.

We have been practicing for our Christmas program. We have a new song and you're going to love it!

Teacher Holly's Class

I am excited to report that the concept of being "A bucket Filler" has finally become concrete as my little people put beads in their very own bucket for being helpful, kind, following directions, laying quiet/napping, have a cheerful good bye to parents, and my all time favorite is when they tell me something good about another student.

Please bring a family photo to put on our our bulletin board in the hall. Thank you to those who already have.

The target letters are M,D,S,T,O. We have been working on my these many different ways. Musical letters, hokey pokey (put your M in, put your M out...), matching and tracing. Some thing I never thought of before is "Teacher Holly has a class, E-I-E-I-O, and in this class she has a M...)

The children where experimenting with magnets, so I have placed items for them to see if they are metal or not. They have even built "robots" with the items in the bucket.

Math has been about number lines and a variation of BINGO. As always, those that know their numbers are eager to help the others.

I have a room full of fun, loving, caring children. Now, if I can only channel all that energy!!! :)

Classroom News

Mrs. Davidson's Class

Thank you to all the parents who came for Student/Parent/Teacher conferences this week! What a blessing to have you all so involved and dedicated to the education of your children. I am so proud of all of my students, and look forward to their continued improvement and success as they grow in knowledge and in God's grace.

Thanks also to those who came to our farm themed Fall Back Party last Saturday night. What a fun evening - and a great way to welcome in the time change!

This week we started our new Bible unit about the good kings of Israel and Judah, specifically Hezekiah and Jehoshaphat. The students did an activity to compare, from the Bible, the number of good kings to bad kings and found there were quite a few more bad kings. They already know from studying Elijah how wicked Ahab was, and were interested to see that he was used as a benchmark for several other kings, who the Bible says were as wicked or even more wicked than he was! This unit will focus on the characteristics of the good kings, and we will see how we can apply those characteristics to our own lives. So far we have learned that it is important to look to God for wisdom, counsel, and help, especially when faced with an important decision.

In PE we have been working on our rope jumping skills. The students have practiced individual jumping, jumping with a long rope and two turners, and even learned some tricks to do by themselves or with partners. Jumping rope requires a lot of coordination and rhythm, so younger students should continue to practice until they master it. The tricks are both challenging and fun, and require even more advanced skills for those who have mastered basic jumping and turning.

Teacher Martha's Class

This week we started the story of creation. Our God had so much fun making our world. Unlimited colors, ideas imagination were available for him to use. We get to see all of that beauty each day. During our morning worship, we have looked at different animals he made. He added some amazing features to them and such detail within our world.

The Kindergartners have started their handwriting/phonic books this week. They are getting use to having lines to follow as they practice their letters. This week we studied in depth the letters, M, S, T, C, P & A. On Friday, we started writing and reading words...cat, cap, mat and map. Next week we should be sending home little readers for them to practice sounding out their words.

While the Kindergartners have been doing their handwriting, the preK's have been working on putting their letters in order. They are doing good at singing the ABC song to figure out what comes next. They have been working very well together to identify the needed letter.

We have been practicing for our Christmas program. We have a new song and you're going to love it!

During our morning worship, we have looked at different animals he made. He added some amazing features to them and such detail within our world.

The Kindergartners have started their handwriting/phonic books this week. They are getting use to having lines to follow as they practice their letters. This week we studied in depth the letters, M, S, T, C, P & A. On Friday, we started writing and reading words...cat, cap, mat and map. Next week we should be sending home little readers for them to practice sounding out their words.

While the Kindergartners have been doing their handwriting, the preK's have been working on putting their letters in order. They are doing good at singing the ABC song to figure out what comes next. They have been working very well together to identify the needed letter.

We have been practicing for our Christmas program. We have a new song and you're going to love it!

Teacher Holly's Class

I am excited to report that the concept of being "A bucket Filler" has finally become concrete as my little people put beads in their very own bucket for being helpful, kind, following directions, laying quiet/napping, have a cheerful good bye to parents, and my all time favorite is when they tell me something good about another student.

Please bring a family photo to put on our our bulletin board in the hall. Thank you to those who already have.

The target letters are M,D,S,T,O. We have been working on my these many different ways. Musical letters, hokey pokey (put your M in, put your M out...), matching and tracing. Some thing I never thought of before is "Teacher Holly has a class, E-I-E-I-O, and in this class she has a M...)

The children where experimenting with magnets, so I have placed items for them to see if they are metal or not. They have even built "robots" with the items in the bucket.

Math has been about number lines and a variation of BINGO. As always, those that know their numbers are eager to help the others.

I have a room full of fun, loving, caring children. Now, if I can only channel all that energy!!! :)

Classroom News

Mrs. Davidson's Class

Thank you to all the parents who came for Student/Parent/Teacher conferences this week! What a blessing to have you all so involved and dedicated to the education of your children. I am so proud of all of my students, and look forward to their continued improvement and success as they grow in knowledge and in God's grace.

Thanks also to those who came to our farm themed Fall Back Party last Saturday night. What a fun evening - and a great way to welcome in the time change!

This week we started our new Bible unit about the good kings of Israel and Judah, specifically Hezekiah and Jehoshaphat. The students did an activity to compare, from the Bible, the number of good kings to bad kings and found there were quite a few more bad kings. They already know from studying Elijah how wicked Ahab was, and were interested to see that he was used as a benchmark for several other kings, who the Bible says were as wicked or even more wicked than he was! This unit will focus on the characteristics of the good kings, and we will see how we can apply those characteristics to our own lives. So far we have learned that it is important to look to God for wisdom, counsel, and help, especially when faced with an important decision.

In PE we have been working on our rope jumping skills. The students have practiced individual jumping, jumping with a long rope and two turners, and even learned some tricks to do by themselves or with partners. Jumping rope requires a lot of coordination and rhythm, so younger students should continue to practice until they master it. The tricks are both challenging and fun, and require even more advanced skills for those who have mastered basic jumping and turning.

Teacher Martha's Class

This week we started the story of creation. Our God had so much fun making our world. Unlimited colors, ideas imagination were available for him to use. We get to see all of that beauty each day. During our morning worship, we have looked at different animals he made. He added some amazing features to them and such detail within our world.
