

Alberta Curriculum

Each of our classes is taught according to the Alberta Curriculum as produced by Alberta Education. Coralwood is governed by both Alberta expectations as well as the North American Division expectations. Every class is taught from a Christian Worldview.

Building Partnerships

To supplement our Math and Physics programs we have been partnering with our sister school, Prairie Adventist Christian eSchool (PACeS). Students meet with their teachers and the rest of their classmates from all over North America in an online classroom environment on a daily basis.

A Growing Program

In addition to online classes, we also partner with other schools in our district in creating opportunities for real-life application of classroom lessons. We join our sister schools in offering Outdoor Survival classes at Jasper National Park for high school credit. We are excited to participate in a NEW opportunity to explore Biology at the Rosario Beach Marine Lab run by Walla Walla University on the Washington coast.

Complementary Course Offerings

To diversify the courses we offer, students can take Alberta Distance Learning Centre (ADLC) courses to further explore interests and develop skills they may have. Courses are monitored by both Coralwood and ADLC teachers to support student success.

High School Program Fact Sheet

Technology 1:1

We are currently an Apple school. Each of our high school students has access to a dedicated laptop for their learning needs.

Smaller Class Sizes

With a low teacher-student ratio, teachers are able to connect with all students in the Junior High and Senior High.

Spirit of Community

With a smaller student body, students are able to develop friendships across grade levels offering peer support academically, socially, and spiritually. In addition, teachers regularly support students from within their own division as well as extend assistance to students in other divisions.

Christian Component

Founded on firm Christian principles, every class is taught from a Christian Biblical perspective. We examine the world through this lens and seek to help our students find ways to meaningfully contribute to their community through various service projects.

Stepping Stone towards Success

Over 80% of Coralwood graduates have been accepted into post-secondary programming in both public and private universities across Canada.

Meet Our Qualified Teachers

Our teachers are required to hold teaching certification for both Alberta Education and the North American Division.

Beverly Adams has been teaching for 16 years and holds two degrees: Bachelor of Arts & Bachelor of Education. She has taught in both public and private systems across Canada: St. Johns, Montreal, Red Deer, and Edmonton. She cares deeply about her students' success and does her best to accommodate for various learning styles.

Kidisty Kifle after acquiring her Masters in Cell and Molecular Biology and working in Biomedical research for several years, felt called to share her love of learning with students. It's been 13 years since then. She has qualified herself as a teacher and worked across Canada sharing her love of science but most of all, sharing the love of God with her students.

Scott MacDonald has returned to Alberta after teaching in Ontario for 20 years. He holds his Bachelor of Arts in Honours English and has his Masters of Arts in Education. He has worked for both public & private schools in Alberta. Familiar with the rigour of the curriculum, he is dedicated to student success and is willing to work with students to achieve their goals.
