Pre-Supervision Checklist

Things to consider at the beginning of clinical supervision

Do I have a copy of their CV?
Have I identified cases that are a fit for their level of experience?
Do I have an updated supervisory agreement?
How often and in what ways with they be evaluated?
Do I have contact info for their other supervisors and training director(s)?
Have I discussed how the supervisee can provide me with feedback?
What should the supervisee do in case of client emergency?
What should the supervisee do in case there are disagreements or concerns about supervision?
Do I have a regularly scheduled time to meet with them blocked off in my calendar?
Who will I consult with if I'm struggling with a supervisee?
