

LUCIS Software
Version 3.4.0 – Release Notice (r1219) – 5/27/2020

Notices for previous releases can be found on the LUCIS Resources web page

For network users: please contact us before running this update!

Highlights (since release 3.3.11)

- This is a maintenance release... no program updates

Detail (since release 3.3.11)

This release updates the underlying Runtime used by LUCIS Software to the latest version. The updated Runtime improves the stability and efficiency of LUCIS Software on Windows 10.

Server based installations is no longer advised with this release. Please use the Network Client install option which will allow for shared credential and report files from a server share. Please contact LUCIS support for more information by emailing lucis@lakeunion.org.
