

Please allow a 30mm quiet area for any important content away from the very top of the artwork. This will ensure the top metal rail doesn't interfere with your design.

Artwork should be supplied:

- With fonts outlined
- As PDF (preferred), AI or EPS

Roller banner 1000 x 2000mm

Please allow a small quiet area for any important content away from the bottom section. This is to ensure your design has some breathing space.

The bottom 200mm must only be used for background colours or left blank. This section will be hidden and rolled into the unit mechanism. Your 2m tall design should bleed at least a third of the way into this area to allow for any height variance of the unit and prevent any white edge showing.
