# shell transformer

## Make a standard shell look like a premium stand

The Shell Transformer enhances a standard exhibition shell scheme into a rich, vibrant, expensive-looking exhibition stand.

The Shell Transformer Kit is an incredibly versatile solution for creating seamless, mural-style Shell Scheme graphics. Shell Transformer consists of a high quality aluminium frame that is supplied in bags that are easy to transport and in manageable sections.

No tools are required during the assembly process, allowing the end user to quickly and easily build their stand. Simply construct the Shell Transformer Kit frame and attach it directly to the wall of your shell using one of the three types of supplied adapter. Between them, the adapters are compatible with all types of aluminium shell scheme commonly used throughout the world.

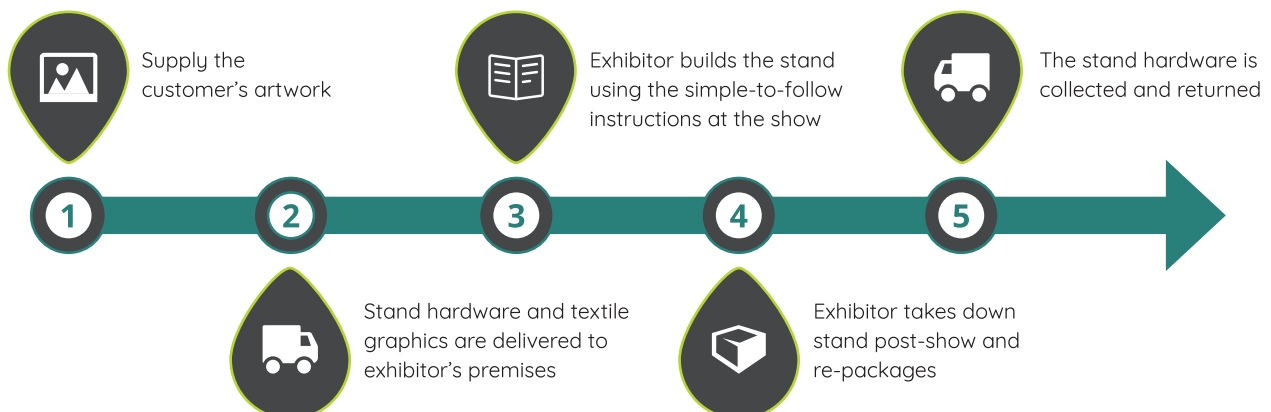

Shell Transformer stands off the pre-existing shell scheme wall by only 60mm, therefore very little valuable floor space is wasted on the stand.

No need to buy and store expensive hardware—it is supplied on a 7 day hire basis and the graphics are yours to keep.

Shell Transformer graphics are printed dye-sublimation on display polyester for rich and vibrant graphics. Each wall graphic is printed in one piece, finished with silicone edging (SEG) and simply push-fits into the T3 framework.

Simple to build and install. Build instructions, risk assessment and method statement are included.

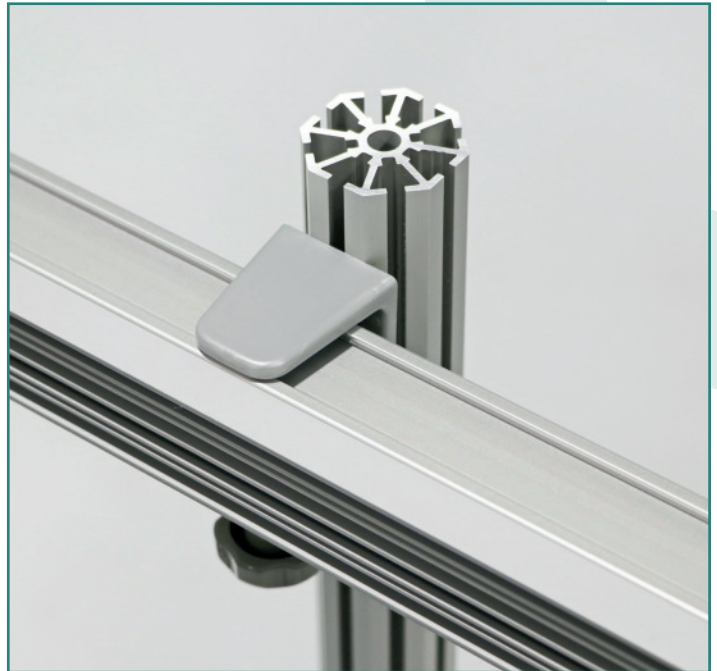

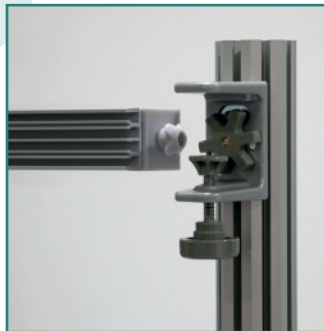

- **Simplicity itself to install**
- **Minimal footprint inside the shell**
- **Build instructions and all relevant documentation included**
- **No need for your customer to buy and store expensive hardware**
- **Rich and vibrant fabric graphics**
- **Delivered to and collected from your or your customer's premises**
- **Great profit potentials**
- **Provides countless additional revenue streams for your business**

# shell transformer

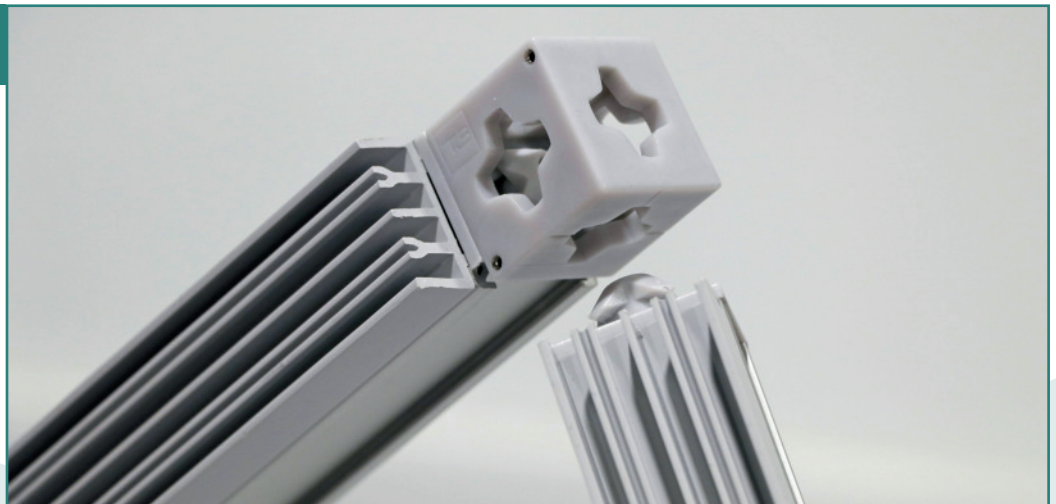

## Shell-Kit Clamp

Integrate Shell Transformer walls within shell scheme spaces with the Shell-kit clamp. The clamp fits all major exhibition and event dividing systems including Octanorm, Foga, Modul, Syma and Unibox.

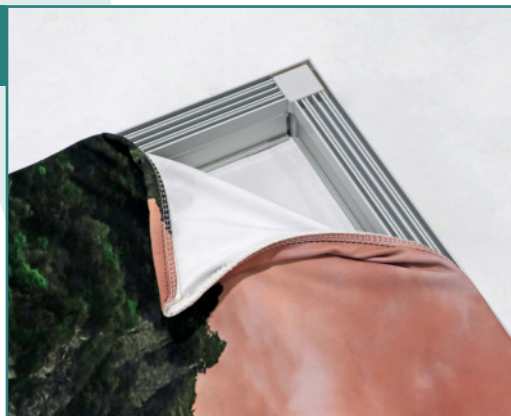

## Frame Build

Twist and lock the frame together. Its that simple.

## Graphics

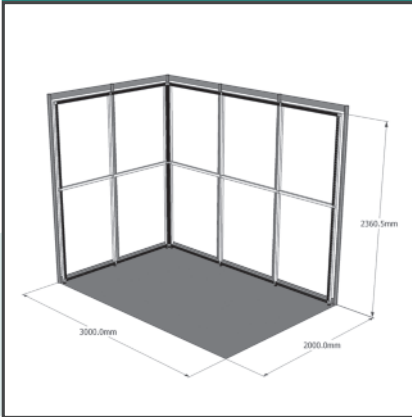

Supplied fabric graphics are silicone edged for ease of fitting. Simply push the silicone into the channel on the Shell Transformer bar for seamless graphics.

# 2Wall

Prices include hire of hardware and fabric graphics delivered to and collected from your premises. Supplied on a 7 day hire basis and the graphics are yours to keep.
