Hole in countertop to be 28mm.

Soap container for 375 ml soap.

Height for pump is: 50 mm, Length for spout is: SD 60 mm & SD-LONG 90 mm.

# Installation SD

## INSTALLATION:

See instructions at the bottom of pg.

## CLEANING AND REFILLING:

To refill the soap-dispenser, take off the dispenser top and refill directly into the soap dispenser bottle. For each refilling - clean the inside of the pump by rinsing it with warm water untill all old soap are out of the pump.

If any soap-leftovers is drying out inside the pump, this will increase the possibility for the pump to be destroyed.

If the soap dispenser has been out of function or not in use for a while so soap has been drying out in the soap refillbottle, this also has to be cleaned. If the soap dispenser is used regularly this will not be necessary.
