

Friends of the Earth and Voice Ireland have established a campaign called ***Sick of Plastic*** to lobby for a reduction in single-use plastics. Local groups have formed in towns around the country. Can we do the same in Trim?

If you would like to get involved, please join using the link below or contact Michael on **087 7716980**. Together we can lobby retailers, decision-makers, and local people to reduce our consumption of single-use plastics before it is too late.
