

Disease & Plague

Throughout the years there have been many community diseases including smallpox, polio, whooping cough, & the Spanish flu.

After a time immunizations became required in order to go to school or travel abroad. Since then we almost never hear about cases of polio, smallpox, or whooping cough.

Now we are dealing with a pandemic affecting the world. Dennis Wilson Warr is now counted among the more than 700,000 Americans who have been a victim of COVID-19.

We, Elaine, Denise, & Rick feel that Dennis' passing is a message to all:

- COVID-19 is real,
- COVID-19 is serious, it can make you ill for:
 - Days,
 - Weeks, or

- Even Years
- Or even take your life.

Our message is to ask anyone willing to be immunized for COVID-19, to do so.

- It is safe,
- It is recommended by the current prophet of the church of Jesus Christ of Latterday Saints

COVID-19 vaccine: what the church leader has said and done

Revered as a prophet by Latter-day Saints, he pleaded throughout 2020 for a vaccine to relieve suffering caused by the pandemic.
