

Work positioning and restraint systems - Dealer PRO 2

VAX 033

©Petzl-Vuedici.org-Vollige-Fonds Belval-Valentiny Hvp Architects

- ▶ Prerequisites:
Completion of the Fall arrest system module - Dealer PRO 1
Knowledge of products in Petzl's fall arrest line
- ▶ Duration:
1 day
Practical workshops: 60% of the training time
- ▶ Documents provided:
Technical documents
Certificate of attendance

▶ Contents

- Regulations - Obligation to inform and advise sellers.
- The principles of precaution and risk analysis.
- Understanding the consequences of a fall on the system (physics approach).
- Recommendations on maintaining and storing Petzl PPE.
- Tools for responding to customers.
- Selection and practical use of fall protection PPE suited to the environment: fall arrest harnesses, fall arrest lanyards, mobile fall arresters for rope...

▶ Why this training?

To understand the differences between fall arrest, work positioning and restraint systems, in order to give better sales advice.

▶ For whom?

- Dealers
- Technical sales reps
- PTI - PTP

▶ Goals:

- To understand the differences between fall arrest, work positioning and restraint systems.
- Selection and use of fall protection PPE (restraint system and work positioning system).
- Understanding PPE:
 - for protection against mechanical impacts (helmets)
 - for protection against falls from height (restraint and positioning systems)
- Understanding and placement of anchors (permanent and temporary).
- Know product selling points.
