FEATURES & BENEFITS

EPA-FDA Approved:

The only Antimicrobial that is EPA approved for hospitals and the FDA for use on skin and food/produce. In Europe it's approved through the EU Biocide and CE Mark. (EPA 93908-1)

The EPA has approved eight Active ingredients that prevent, destroy, repel or mitigate a pest, in this case SARS-CoV-2, the novel coronavirus that causes COVID-19.

VIROLYZE has 2 of the Eight Active Ingredients to Kill COVID-19 Highlighted Below:

The eligible active ingredients are

- Citric Acid (Chlorine Dioxide)
- Ethanol
- Glycolic Acid
- Hydrochloric Acid
- **Hypochlorous Acid**
- Hydrogen Peroxide
- L-Lactic Acid
- **Sodium Hypochlorite**

VIRO^{lyze}TM

FEATURES & BENEFITS

Safe & Effective:

80 to 100 times more effective than bleach while being much safer to use than hydrogen peroxide, ammonia, or alcohol. Nearly the same pH as your skin and is actually good for your skin.

A substance the human body produces to kill germs, protect, and heal itself.

VIR^olyze™

FEATURES & BENEFITS

No Chemicals:

In any application VIROLYZE (HOCl-Hypochlorous Acid) is a weak acid that occurs naturally in our body. Neutrophils are white blood cells that are the First to arrive on site when an invading pathogen is detected. Neutrophils will chase down and engulf the pathogen through phagocytosis. Upon Contact, Neutrophils releases a burst of veridical and bactericidal chemicals Including the most powerful oxidizing agent, (HOCl). This kills the pathogen by dissolving the pathogen cell membrane and proteins, thus destroying the DNA. To effectively disinfect surfaces of all pathogens VIROLYZE is applied in a higher concentration (150 ppm) and in greater quantity and quality to Establish the desired complete kill.

VIROLYZE has been proven to Kill in 20 Seconds!

FEATURES & BENEFITS

Environmentally Friendly:

- 100% Natural Ingredients

After VIROLYZE does the job it reverts to the salt and water it was created from on its return to the ocean. It's a great air deodorizer, not a cover up.
