## **SARGENT STRAIGHT COTTONWOOD**

**POPULUS SARGENTII  
'JERONIMUS'**

Selected for its more uniform upright growth and branch habit, this male form of Sargent Cottonwood grows well in the western plains states. Distinctly upright in younger years, trees can become more rounded with age. Triangle-shaped light green leaves are rather glossy and remain clean through the growing season. Older trees develop a thick rough bark. This is a cotton-less variety.

## **SENSATION MAPLE**

**ACER NEGUNDO**

A beautiful, medium sized tree with symmetrical branching structure. Leaves are green with a pink/apricot tinge in the spring and summer, and red, orange, and yellow in the fall. This is an ideal shade tree with minimal leaf litter.
