Checklist for AAPOR TI

Survey: Alabama Republican Runoff Poll (June 2022)

TI Disclosure Elements	Answers
1. Who sponsored the TI Research and who conducted it. If different from the sponsor, the original sources of funding will also be disclosed.	**Emerson College** **Nexstar Media**
2. The exact wording and presentation of questions and response options whose results are reported. This includes preceding interviewer or respondent instructions and any preceding questions that might reasonably be expected to influence responses to the reported results.	**See Below**
3. A definition of the population under study and its geographic location.	**Republican runoff voters in Alabama**
4. Dates of data collection.	**June 12-13, 2022**
5. A description of the sampling frame(s) and its coverage of the target population, including mention of any segment of the target population that is not covered by the design. This may include, for example, exclusion of Alaska and Hawaii in U.S. surveys; exclusion of specific provinces or rural areas in international surveys; and exclusion of non-panel members in panel surveys. If possible the estimated size of non-covered segments will be provided. If a size estimate cannot be provided, this will be explained. If no frame or list was utilized, this will be indicated.	**Data was collected using a list of 20,000 mobile numbers and a multistage probability sample of 34,740 landlines provided by L2.**
6. The name of the sample supplier, if the sampling frame and/or the sample itself was provided by a third party.	**Aristotle, LLC** **L2**
7. The methods used to recruit the panel or participants, if the sample was drawn from a pre-recruited panel or pool of respondents.	**N/A**
8. A description of the sample design, giving a clear indication of the method by which the respondents were selected, recruited, intercepted or otherwise contacted or encountered, along with any eligibility requirements and/or oversampling. If quotas were used, the variables defining the quotas will be reported. If a within-household selection procedure was used, this will be described. The description of the sampling frame and sample design will include sufficient detail to determine whether the respondents were selected using probability or non-probability methods.	**See #5**
9. Method(s) and mode(s) used to administer the survey (e.g., CATI, CAPI, ACASI, IVR, mail survey, web survey) and the language(s) offered.	**IVR and SMS-to-web**

10. Sample sizes (by sampling frame if more than on was used) and a discussion of the precision of the findings. For probability samples, the estimates of sampling error will be reported, and the discussion will state whether or not the reported margins of sampling error or statistical analyses have been adjusted for the design effect due to weighting, clustering, or other factors. Disclosure requirements for non-probability samples are different because the precision of estimates from such samples is a model-based measure (rather than the average deviation from the population value over all possible samples). Reports of non- probability samples will only provide measures of precision if they are accompanied by a detailed description of how the underlying model was specified, its assumptions validated and the measure(s) calculated. To avoid confusion, it is best to avoid using the term "margin of error" or "margin of sampling error" in conjunction with non-probability samples.	**The Republican runoff sample consisted of likely voters, n=1,000, with a margin of error (MOE) of +/- 3 percentage points.** **A screening question was asked if the voter was very likely to vote in the Republican runoff election. If the respondent said they were not very likely to vote, they were eliminated from the sample.**
11. A description of how the weights were calculated, including the variables used and the sources of weighting parameters, if weighted estimates are reported.	**The data was weighted by gender, age, education, race, and region based on 2022 turnout modeling**
12. If the results reported are based on multiple samples or multiple modes, the preceding items will be disclosed for each. ***Reviewer: Type NA if not applicable.***	**N/A**
13. Contact for obtaining more information about the study.	**emersonpolling@emerson.edu**

1. How likely are you to vote in the June 21st primary runoff election?
    Not at all likely (end)
    Not very likely (end)
    Somewhat likely (end)
    Very likely

2. Are you registered to vote?
    Yes
    No (end)

3. What primary runoff do you plan to vote in?
    Democratic runoff (end)
    Republican runoff

4. In the Republican primary runoff for the U.S. Senate, who do you plan to vote for?
    Katie Britt (go to 6)
    Mo Brooks (go to 6)
    Undecided

5. Though you are undecided, what candidate are you leaning towards at this time?
    Katie Britt
    Mo Brooks

6. If Donald Trump endorsed a candidate, would that make you more or less likely to vote for that candidate?
   More likely
   Less likely
   No difference

7. If a Republican Party candidate had in the past supported a Democratic Party candidate in an election, would that make you more or less likely to support that candidate for U.S. Senate?
   More likely
   Less likely
   No difference

8. Have the shootings in Buffalo and Uvalde made you more likely to support stricter gun control laws, less likely to support stricter gun control laws, or has your opinion on gun control not changed as a result of the shootings in Buffalo and Uvalde?
   More likely to support stricter gun control laws
   Less likely to support stricter gun control laws
   No change in opinion

9. Would you support or oppose a law which would require a person to obtain a police permit before he or she could buy a gun?
   Support
   Oppose
   Unsure or no opinion

10. Alabama allows a citizen with a pistol permit to carry a concealed gun for personal protection. Do you think this law helps improve public safety or contributes to violent crime?
    Improves public safety
    Contributes to violent crime
    Unsure or no opinion

11. For statistical purposes only, can you please tell me your ethnicity?
    Hispanic or Latino of any race
    White or Caucasian
    Black or African American
    Asian
    Other or multiple races

12. What is your age range?
    18-29 years
    30-49 years
    50-64 years
    65 or more years

13. What is the highest level of education you have attained?
    High school or less

Some college
College graduate
Postgrad or higher

14. Please select the type of area where you live
    Urban/city
    Suburban
    Rural

15. What is your gender?
    Male
    Female
    Nonbinary or other

16. What congressional district do you live in?
