Preschool Classroom
Adventurers in the Kindergarten Room
Pathfinders in the Youth room upstairs

Fridays—

2:30pm, Lego Robotics

**The month of March is Nutrition Month!
Think of healthy things to eat and make it a
good habit!
Mrs. Briggs, a dietician, came and talked to
all the classrooms about health eating habits.**

Bible Study every Thursday
night at 6:00 in the preschool.
You are welcome to join us at
any time as we go through the
Bible and discuss how it
pertains to our lives.
(bring your kids and they can
play in the preschool while
we do Bible study)

Hot Lunch—\$4

Tuesday—Pizza

Thursday—Macaroni & Cheese

Classroom News

Mrs. Davidson's Class

Happy Daylight Savings Time! The first week after the time change is usually a challenge with body clocks adjusting to the new normal. We are ready for spring, and loving the warmer weather.

Our Bible unit is a continuation of Joseph's story, when he was in Egypt. Our science unit has been about fossils and how the flood impacted the Earth's structure. We started our hockey unit in PE and the kids are practicing their basic dribbling skills.

Next Friday is the end of the quarter, and the we have Spring Break. Be aware that we have had to cancel our visit to the nursing home that was scheduled for next week because of precautions due to the coronavirus necessary for the residents there. Also, please follow the school guidelines of washing hands whenever you come to the school. Students should wash with soap and water in a sink, and there is hand sanitizer in the entryway for visitors who aren't staying long.

Have a great weekend!

Teacher Martha's Class

We started a two week unit of health, bodies and the 5 senses. This unit has so much to do! Haylee (our student intern) helped us trace our bodies and then we have been adding our organs. The kids have done great at coloring them and cutting them out. With each organ, we learn about it. The kids are of course intrigued with the heart. They really were confused by the look of the heart...one kiddo said "its the wrong shape." They really caught onto how fast our brains communicate with the rest of our bodies...faster than you can blink. We also have touched on the 5 senses...the kids have them memorized and we have been finding out what each sense does. We also have talked about nutrition. Carol Briggs came and talked with us about nutrition. She is the lady who owns the apple orchard we visit in the fall. We learned about foods and where they come from and why they are good for us.

In Bible we continued to learn about Daniel and his friends. They are living in the kings castle and choose to not eat his food, but instead asked to eat fruits, veggies, nuts and grains. They were able to witness to the king and his helpers. Their minds and bodies were sharper and healthier because they choose to eat healthy foods. God has given us many good choices and it is up to us to eat the right foods. It did my heart good as we were making waffles for snack and a kiddo heard me telling another kiddo what was in the waffle mix. As I said oil, he pipes up, we are not supposed to eat oils and fats! Another conversation about moderation and yes, very little oil and butter. The kids loved the waffles even though they only had a bit of maple syrup in the batter and no added butter on top.

A very busy, but fun week with an emphasis on science. Stop by and check out their bodies on the hallway walls.

Teacher Holly's Class

Zacchaeus is the subject of our Bible story. It's an excellent opportunity to reinforce the fact that no matter where we are or what we've done, Jesus is always waiting.

I've taken the letters to all their names to a new level. I held up a letter, they raised their hands if they have that letter. Then place them in the right order. Some totally aced it, others it's a learning process.

We are working on patterning with beads and Legos as well as blocks. I enjoy watching their progress.
