Looking at the 2013 national drug household survey **Methamphetamine** comes as the 5th most consumed drug which is increasing rapidly annually. [Buy meth online.](#)

Research in the US shows that 1 in every 15 Americans have once used or is using

Many people have moved from the regular BASE and SPEED form to ICE.

Reason being that "ICE" has a higher purity which equally implies that the latter is much more potent than the former and the price has dropped.

Methamphetamine was developed in 1919, at one stage it was used in medicine in the field of psychiatry similar to the other Hallucinogenic drugs which were used in psychiatry to make people talk and was used as an anti-depressant at some stage.
