Dissertation Review

Date: September 29, 2015

Author: Victoria Rader

Title: Until You Shine: Answering Six Universal Questions as to Why You Matter

Degree Title: Philosopher of Metaphysical Sciences, Ph.D.

Review Advisor: Judith Pasko

Status: Passed

Thesis Statement: Thesis statement is clearly communicated and found in introduction.

(The purpose of this work is to demonstrate that, we matter most when we align our lives with the law of the light and submit all matter to the light.)

Comments:

Thank you for this wonderful exploration of the laws of the universe, and insight into how we can all shine our brightest and live in the light as much as possible.

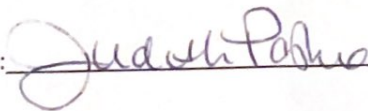

Your *Review of Literature* shows a wonderful selection of books, and includes descriptions which entice me personally to want to read each of them!

Your research is incredibly well laid-out. Breaking the laws down into the sections of what, who, when, where, how, and why, gave clarity and organization to a great deal of information. Your writing style, the flow of information, the quotes you chose to include, and your explanation of them make your paper a very inspiring read! These laws hold true, and we can all benefit from keeping our awareness of them.

Your discussion and conclusion do a great job of summarizing your research, offering encouragement, and reiterating your point.

You mention in your personal relevance that you have offered classes in the past. This would be a wonderful workshop to offer! I would recommend reading this dissertation to anyone, as you offer a quick and straightforward guide to aligning our lives with these laws and allowing ourselves to shine. I encourage you to share this with as many people as possible, Victoria. We appreciate your focus and dedication to this research, Victoria; it led to an incredible result. Congratulations on completing your doctoral degree, and continue to shine forth!
