Checklist for AAPOR TI

Survey: February 2022 Ohio Primary Poll

TI Disclosure Elements	Answers
1. Who sponsored the TI Research and who conducted it. If different from the sponsor, the original sources of funding will also be disclosed.	Emerson College Nexstar Media
The exact wording and presentation of questions and response options whose results are reported. This includes preceding interviewer or respondent instructions and any preceding questions that might reasonably be expected to influence responses to the reported results.	See Below
3. A definition of the population under study and its geographic location.	Likely voters in Ohio
. Dates of data collection.	February 25-26, 2022
5. A description of the sampling frame(s) and its coverage of the target population, including mention of any segment of the target population that is not covered by the design. This may include, for example, exclusion of Alaska and Hawaii in U.S. surveys; exclusion of specific provinces or rural areas in international surveys; and exclusion of non-panel members in panel surveys. If possible the estimated size of non-covered segments will be provided. If a size estimate cannot be provided, this will be explained. If no frame or list was utilized, this will be indicated.	Data was collected using a list of 10,000 mobile numbers and a multi-stage probability sample of 19,689 landlines provided by L2, with an online panel provided by Amazon Mturk.
6. The name of the sample supplier, if the sampling frame and/or the sample itself was provided by a third party.	Aristotle, LLC Amazon MTurk L2
7. The methods used to recruit the panel or participants, if the sample was drawn from a pre-recruited panel or pool of respondents.	Amazon MTurk uses opt in panels and not online ads to recruit participants
8. A description of the sample design, giving a clear indication of the method by which the respondents were selected, recruited, intercepted or otherwise contacted or encountered, along with any eligibility requirements and/or oversampling. If quotas were used, the variables defining the quotas will be reported. If a within-household selection procedure was used, this will be described. The description of the sampling frame and sample design will include sufficient detail to determine whether the respondents were selected using probability or non-probability methods.	See #5
9. Method(s) and mode(s) used to administer the survey (e.g., CATI, CAPI, ACASI, IVR, mail survey, web survey) and the language(s) offered.	IVR, Online, and SMS-to-web

10. Sample sizes (by sampling frame if more than on was used) and a discussion of the precision of the findings. For probability samples, the estimates of sampling error will be reported, and the discussion will state whether or not the reported margins of sampling error or statistical analyses have been adjusted for the design effect due to weighting, clustering, or other factors. Disclosure requirements for non-probability samples are different because the precision of estimates from such samples is a model-based measure (rather than the average deviation from the population value over all possible samples). Reports of non- probability samples will only provide measures of precision if they are accompanied by a detailed description of how the underlying model was specified, its assumptions validated and the measure(s) calculated. To avoid confusion, it is best to avoid using the term "margin of error" or "margin of sampling error" in conjunction with non-probability samples.	The general election sample consisted of somewhat likely voters in Ohio, n=723 with a Credibility Interval (CI) similar to a poll's margin of error (MOE) of +/- 3.6 percentage points. The Democratic primary sample consisted of likely voters, n=313, with a Credibility Interval (CI) similar to a poll's margin of error (MOE) of +/- 5.5 percentage points. The Republican primary sample consisted of likely voters, n=410, with a Credibility Interval (CI) similar to a poll's margin of error (MOE) of +/- 4.8 percentage points. A screening question was asked if the voter was a likely voter. If the respondent said they were not likely to vote, they were eliminated from the sample.
11. A description of how the weights were calculated, including the variables used and the sources of weighting parameters, if weighted estimates are reported.	The data was weighted by gender, age, education, race, and region based on 2020 turnout modeling
12. If the results reported are based on multiple samples or multiple modes, the preceding items will be disclosed for each. Reviewer: Type NA if not applicable.	N/A
13. Contact for obtaining more information about the study.	emersonpolling@emerson.edu

1. Do you approve or disapprove of the job that Joe Biden is doing as President? Approve Disapprove Neutral or no opinion 2. Do you approve or disapprove of the job that Mike DeWine is doing as Governor? Approve Disapprove Neutral or no opinion 3. What is your party affiliation? Not registered to vote (end) Democrat Republican Independent 4. How likely are you to vote in the Ohio primary on May 3? Very likely Somewhat likely 50-50 Not very likely (end) Not at all likely (end) 5. What primary do you plan to vote in? Democratic primary Republican primary (go to 10) 6. In the Democratic primary for Governor, who do you plan to vote for? John Cranley Nan Whaley Undecided 7. In the Democratic primary for Senate, who do you plan to vote for? Morgan Harper Traci Johnson Tim Ryan LaShondra Tinsley Undecided 8. If President Biden endorsed a candidate, would that make you more or less likely to vote for that candidate? More likely Less likely No difference

9.	If President Joe Biden visited your community to hold a campaign rally, do you think you would or would not attend? Would attend (go to 15) Would not attend (go to 15) Unsure (go to 15)
10.	In the Republican primary for Governor, who do you plan to vote for? Mike Dewine Joe Blystone Ron Hood Jim Renacci Undecided
11.	In the Republican primary for Senate, who do you plan to vote for? Matt Dolan Mike Gibbons Bill Graham Josh Mandel Neil Patel Mark Pukita Jane Timken JD Vance Undecided
12.	Does Senator Rob Portman endorsing Jane Timken make you more or less likely to vote for her? More likely Less likely No difference
13.	If Donald Trump endorsed a candidate, would that make you more or less likely to vote for that candidate? More likely Less likely No difference
14.	If Donald Trump visited your community to hold a campaign rally, do you think you would or would not attend? Would attend Would not attend Unsure
15.	What do you think is the most important issue facing Ohio? Healthcare Covid-19 Education Jobs Taxes

Inflation Foreign affairs **Immigration** Something else 16. Do you think gambling on professional sports should be legal in Ohio? Should be legal Should not be legal Unsure 17. Do you think gambling on college sports should be legal in Ohio? Should be legal Should not be legal Unsure 18. Do you think marijuana should be legal for recreational purposes in Ohio? Yes No Unsure or no opinion 19. Which of the following is closest to your view - The events of January 6th, 2021 was protected political speech or it was an illegal insurrection It was protected political speech It was an illegal insurrection Unsure or no opinion 20. Do you believe Ohio runs fair elections? Yes No Unsure or no opinion 21. Who did you vote for in the 2020 election? Joe Biden Donald Trump Someone else Did not vote 22. For statistical purposes only, can you please tell me your ethnicity?

Hispanic or Latino of any race

White or Caucasian

Black or African American

Asian

Other or multiple races

23. What is your age range?

18-29 years

30-49 years 50-64 years 65 or more years

24. What is the highest level of education you have attained?

High school or less

Some college

College graduate

Postgrad or higher

25. Please select the type of area where you live

Urban/city

Suburban

Rural

26. What is your gender

Male

Female

Nonbinary or other

27. What congressional district do you live in?
