

Dear Healthcare Professional,

In AsIAm, we understand that wearing your PPE is essential to the health and safety of both yourself and those in your care. However, for some members of the Autism Community, this may make an already difficult time more distressing.

We saw some healthcare professionals online had the innovative idea to put their photo on their front. We have identified that this would be particularly helpful for many in our community and therefore we have developed this template for you that you can download, paste your own photo onto, print off and laminate.

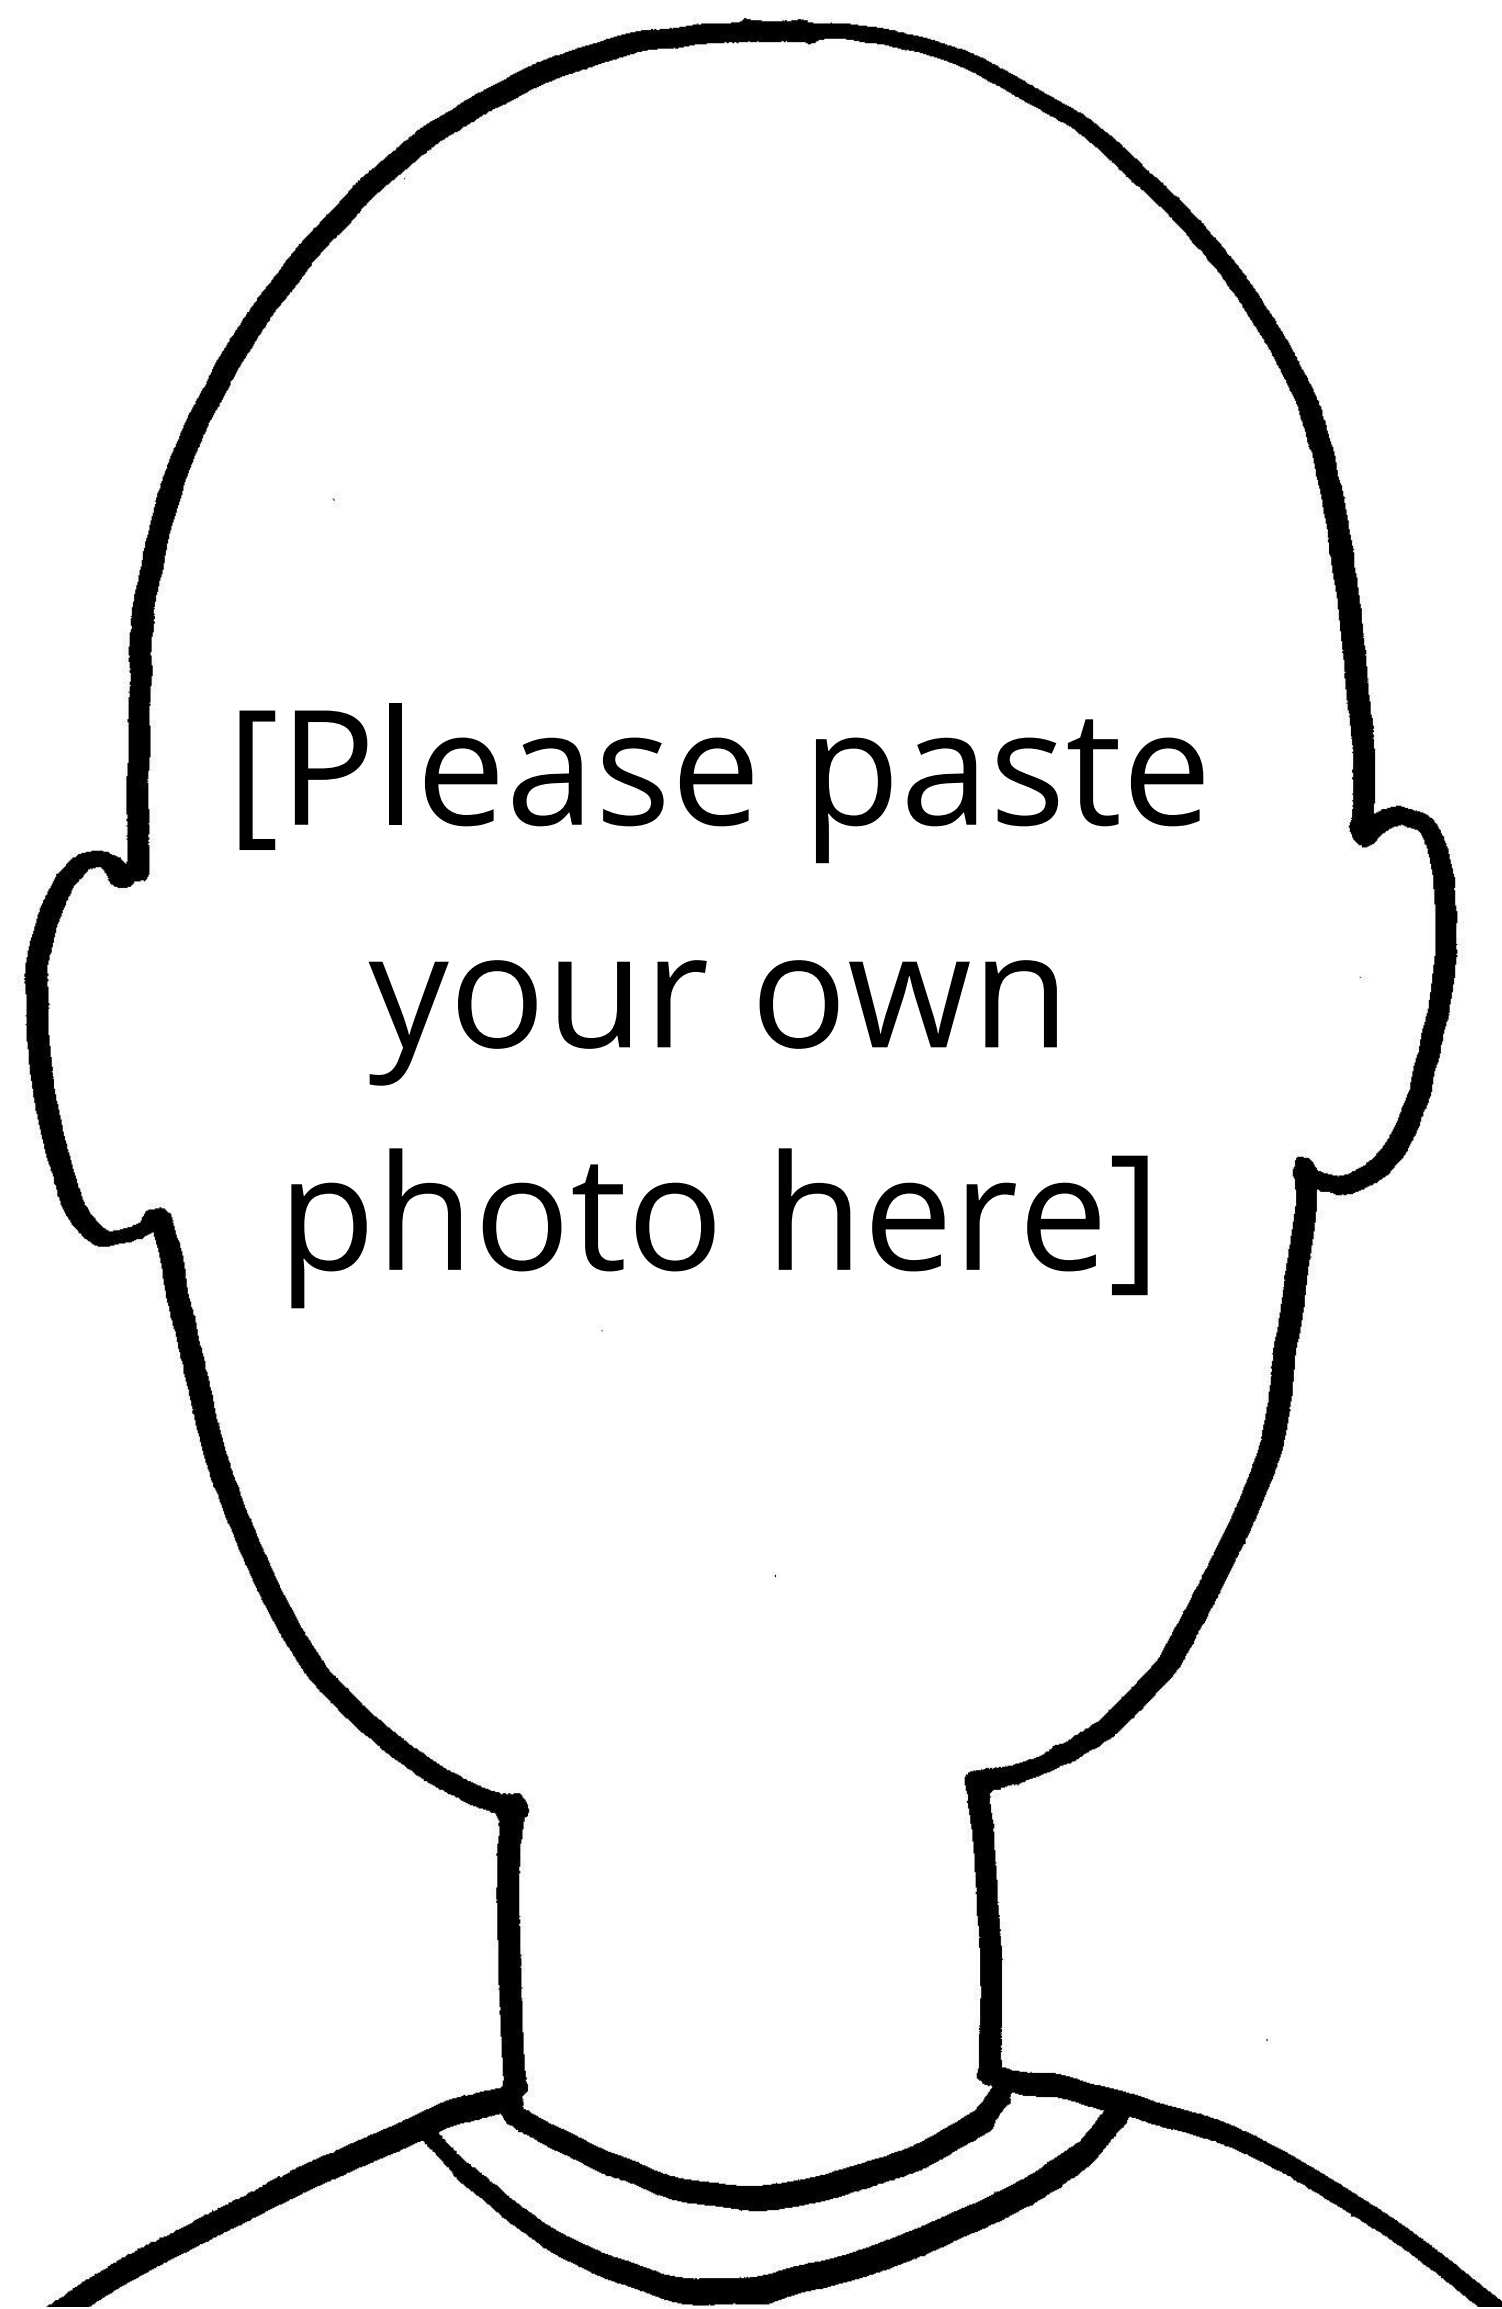

By wearing this on the front of your PPE, it will reassure many people in your care and help to 'humanise' a very unfamiliar experience.

Thank you for all the great work that you are doing!

The AsIAm Team 😊

This is me

Nice to meet you!
