

Principal's Message

Greetings,

Even before I arrived at Dupont Park Adventist School (DPAS), I knew this School was special. I was truly inspired to think that I could become a part of this family and feel privileged to serve as the principal. Once I arrived and met the wonderful students we serve, interacted with families, teachers and staff, I knew why DPAS has such a wonderful reputation. The commitment from the teachers and staff in supporting and strengthening this school in all areas is evident in the increasing academic success of students. DPAS educators are continually evolving and often re-inventing the work to stay up to date in a global market with high demands for our students. We want our DPAS graduates to lead academically, spiritually and socially, and to be technologically skilled and ready to face the world with confidence in any path they choose to follow. We are fortunate to serve a community and church that values education and wants the best for its students, future citizens, and community members. This is the very reason many students often return to serve the school and the community. We believe that all DPAS students can reach their full potential in our school. We also believe that every student has the capacity to learn and continuously improve. DPAS students deserve our best, and their success is our own!

Sincerely,

Grace Ameyan
