

# <sup>1</sup>Shoreline Christian School

## Communicable Disease School Management Plan

This document outlines the steps necessary to implement the reduction of a virus outbreak on our campus and maintain, to the greatest extent possible, the health of students and staff. In order for on-site learning to take place certain precautions must be observed, processes put in place, cleaning protocols followed, and all school personnel properly educated and trained.

### **Shoreline Christian School designated Safety Officer is:**

Sara Lasu

### **The Safety Officer is responsible to:**

1. Ensure that daily records, including contact tracing information, are kept of all who come and go throughout the school day. These logs must be maintained for a minimum of 4 weeks after completion of in-person/on-site instruction.
2. Maintain a student contact tracing plan, which must include student name, family and emergency contact information, drop-off/pick-up time and adults responsible for both drop-off/pick-up and all staff that interact with each group of students.
3. Ensure health and safety precautions are followed.

### **Shoreline Adventist Elementary Emergency Preparedness Plan – Response to Outbreak**

1. Document any observed case of elevated temperature or other symptoms of COVID-19.
2. Report any cluster of illness (2 or more people with similar illness in the same cohort) to local public health authority (LPHA), typically the county Health Department and follow any instructions received from them.
3. Report any confirmed case of COVID-19 to the LPHA.
4. Communicate potential or confirmed COVID-19 cases to the school community, local school board, and other stakeholders.
5. If a positive case is confirmed, notify local superintendent, Gale Crosby.
6. Pending instructions from the LPHA:
  - Discourage extracurricular activities and gatherings of staff, students and their families, both private and public. We recommend sheltering-in-place at home.
  - Modify, postpone, or cancel any large-group school activities.
7. Collaborate with the LPHA to determine the need for and/or length of a whole-school closure.

### **Staff & Teacher Preparation Prior to Resuming Instruction**

- Follow ODE guidelines in communicating this plan to families and constituents.
- Post signs on how to stop the spread of COVID-19, properly wash hands, promote everyday protective measures, and wear a face covering as needed.
- Ensure that instructional spaces have at least 35 square feet per person, including teaching staff.

---

<sup>1</sup> Revised 8/3/2020

- Establish routines for effective sanitizing of all high-touch surface areas throughout the day (e.g. desks, doorknobs, light switches, toilets, faucets, etc).
- The teacher will establish a plan to perform or supervise a routine cleaning of touchpoints at various points during the day, along with a plan for teachers or custodians to conduct a daily wipe-down of all touchpoints with disinfectant.
- Staff will be instructed on:
  - Proper use, removal, and washing of face masks/shields.
  - Avoiding touching the face or face covering as much as possible.
  - Washing or sanitizing hands every day upon entry to the school.
  - Washing hands or sanitizing frequently during the school day, especially before/after meals, playground usage.

### **Staff & Teacher Responsibilities Upon Resuming Instruction**

- Provide “Coronavirus (COVID-19) Fact Sheet” to all adult guardians with children enrolled in the school.
- Conduct a visual health screening of all staff, students, and visitors upon arrival, taking temperature as needed, and following other county and CDC guidelines to monitor for symptoms.
  - Symptoms of COVID-19 include cough, fever, chills, shortness of breath or difficulty breathing, muscle pain, headache, sore throat, new loss of taste or smell, diarrhea, nausea, vomiting, nasal congestion, and runny nose.
  - Any person exhibiting primary symptoms of COVID-19 shall not be admitted to campus.
  - Anyone displaying or reporting the primary symptoms of concern must be isolated and sent home as soon as possible (and remain home until 72 hours after fever is gone without fever reducing medicine and other symptoms are improving).
- Teacher will maintain daily student attendance log.
- Principal will maintain a daily log of employees on campus as well as of visitors who come during the school day.
- Use of cloth face coverings/face shields according to ODE guidelines. All staff will wear appropriate face coverings.
- Monitor student physical distancing on playground, fields, recess, and breaks to greatest extent possible.

### **Joint School & Student Responsibilities**

- Create and support conditions for students to be successful in practicing and learning new and not-so-intuitive safe health guidelines and procedures.
- Maintain a developmental view of students while elevating and practicing heightened awareness of health and safety needs.
- When students falter in adhering to the new operating procedures, maintain a positive attitude, focusing on grace and patience instead of punishment. Never implement consequences that deny access to learning.
- All students in grades Kindergarten and above will wear face shields or face coverings.
- Avoid touching faces or face masks as much as possible and monitor closely the use of face coverings by children.

- Cover coughs and sneezes with a tissue or elbow. Tissues should then be immediately discarded in the garbage can, and hands should be washed or sanitized.
- Support physical distancing in all daily activities, maintaining at least six feet between individuals to the maximum extent possible.
- Encourage use of personal water bottles labeled with students' names.
- Utilize handwashing facilities and teach/learn routines for effective handwashing of at least 20 seconds with soap and water.
  - Wash hands or sanitize every day upon entry to the school building.
  - Wash hands or sanitize before eating, preparing or serving food, before/after meals, before/after playground activities.
  - Hands will be washed for 20 seconds or more after bathroom use.
  - Encourage the use of songs or other motivators to teach/promote effective handwashing practices.
- Limit sharing of school supplies, books, electronic devices, etc. unless properly washed/sanitized between uses or adequate time is given between uses (more than 72 hours).

### Cleaning Procedures

Shoreline Christian School will be cleaned at least daily, referring to the following CDC-aligned protocols to minimize the risk of exposure to COVID-19. Cleaning frequency will be increased for frequently touched surfaces.

#### Step 1: Clean

- Wear disposable gloves to clean and disinfect according to product label instructions.
  - Additional personal protective equipment (PPE) may be required based on the cleaning/disinfectant products used and whether there is a risk of splash.
- Clean surfaces daily using soap and water, then use disinfectant. **Some products may accomplish the cleaning and disinfecting process in one step.**
- More frequent cleaning and disinfecting may be required based on level of use. High touch surfaces include: Tables, doorknobs, light switches, handles, learning areas, phones, keyboards, toilets, faucets, sinks, etc.
- **Note:** *Some surfaces may only need to be cleaned with soap and water. For example, surfaces and objects that are not frequently touched should be cleaned and do not require additional disinfecting. Additionally, disinfectants should typically not be applied on items used by children, especially any items that children might put in their mouths. Check the label of all products to verify their safe use around children.*

#### Step 2: Disinfect

- Recommend use of EPA-registered household disinfectant.
- Follow the instructions on the label to ensure safe and effective use of the product. Many products recommend:
  - Keeping surface wet for a period of time (consult product label).
  - Follow precautions such as wearing gloves and making sure you have good ventilation during use of the product.
- Diluted household bleach solutions may also be used if appropriate for the surface.
  - Check the label to see if your bleach is intended for disinfection, and ensure the product is not past its expiration date. Some bleaches, such as those designed for safe use on colored clothing or for whitening may not be suitable for disinfection.

- Unexpired household bleach will be effective against coronaviruses when properly diluted.  
Follow manufacturer's instructions for application and proper ventilation. Never mix household bleach with ammonia or any other cleanser.  
Leave solution on the surface for at least 1 minute.
- To make a bleach solution, mix:
  - 5 tablespoons (1/3rd cup) bleach per gallon of water  
OR
  - 4 teaspoons bleach per quart of water
- Bleach solutions will be effective for disinfection up to 24 hours.
- Alcohol solutions with at least 60% alcohol may also be used.

### **Safety, Cleaning, and Disinfecting Supplies**

- Principal will ensure that employees are provided with masks and gloves to accomplish recommended cleaning and disinfecting activities, in a timely manner.
- Principal will ensure that soap, hand sanitizer, tissues, paper towels and trash cans are readily available for student and staff use.
- Principal will ensure that cleaning and disinfecting supplies are readily available to accomplish periodic cleaning and disinfecting activities.

### **Soft Surfaces**

- Remove any items that are difficult to clean, such as non-essential furniture, toys, etc. that are difficult to sanitize.
- For soft surfaces such as carpeted floor and rugs:
  - Clean using soap and water or with cleaners appropriate for use on these surfaces.
  - Launder items (if possible) according to the manufacturer's instructions. Use the warmest appropriate water setting and dry items completely.  
OR
  - Disinfect with an EPA-registered household disinfectant.
- Vacuum as usual.

### **Technology/Electronics**

- For electronics, such as tablets, touch screens, and keyboards follow manufacturer's instruction for cleaning and disinfecting.
- If no guidance, use alcohol-based wipes or sprays containing at least 60% alcohol.

### **Playground Equipment/Outdoor Areas**

- Playground will be closed to family, friends, and visitors.
- Outdoor areas, such as playgrounds generally require normal routine cleaning, but do not require disinfection.
- High touch surfaces made of plastic or metal, such as grab bars and railings, should be cleaned and disinfected routinely (at least daily).
- Cleaning and disinfection of wooden surfaces (play structures, benches, tables) or groundcovers (mulch, sand) is not recommended.
- Students should wash/sanitize their hands after use of shared items.

- Keep playground closed to the public until park, playground equipment, and benches reopen in the community.
- Sidewalks and roads should not be disinfected.

#### **Common-Use Areas**

- Hand sanitizer stations must be located at each entry point. Hand sanitizer should be at least 60% alcohol.
- Principal will disable or block the drinking fountain. Students must clearly mark their water bottles and use only their personal water bottle.

#### **STEAM/Art Supplies**

- Sara Lasu, principal, will ensure adequate supplies to minimize sharing of high touch materials to the extent possible (art supplies, lab equipment, etc.) or limit use of supplies and equipment by one group of children at a time and clean and disinfect between use.

#### **Student Pick-up/Drop-off**

- Develop a plan for child pick-up and drop-off that limits direct contact between parents and staff members.
  - Have parents/guardians wear masks if they come out of their vehicles and respect 6 ft distance markers leading to entrance. They should not enter the building.
- Supervise front drop off area to ensure students are adhering to distancing guidelines.
- Students will enter through south door and exit school through east classroom door.
- Upon arrival, staff members will conduct a health screening of all students prior to their entering the school building. Once class has begun, tardy students will be screened at the south door outside the classroom. The parent or guardian will call when they arrive and wait for a staff member to be at the door ready to screen the student.
- Logs of health screening will be kept for a minimum of 4 weeks.

#### **Maintaining Health & Safety during Student Transitions**

- For the health and safety of those in the school, visitors to the building and classrooms shall be limited to those with essential business.
- When leaving for lunch, recess, or P.E., students will be dismissed to wash or sanitize hands and exit to their designated area. Students will always be supervised by staff.
- Classroom transitions will be limited to the greatest extent possible.
- Floors will be marked for 6ft distancing for students to use when waiting in line. When going outside, students will be released in threes to all wash hands before exiting.
- Establish an exit path from the classroom to the restroom that maintains 6ft distancing.
- For classrooms with sinks, rotate students washing hands as needed.
- Encourage students to wash or sanitize hands when transitioning between activities, before and after every snack and meal; after coming inside; after sneezing, blowing the nose, or coughing.
- Ensure that students eat at their desks and maintain 6 ft distance while preparing and warming food. A staff member will run the microwave and toaster oven and sanitize handles and buttons before and after use. Students will be the only one to touch their own dishes.
- Prohibit the sharing of food or utensils.

### **Essential Visitor Responsibilities**

- Undergo health screening for symptoms upon entry into school.
- Maintain appropriate physical distancing.
- Wash or sanitize hands upon entry and exit.
- Wear face covering.

### **Staff Member, Student, or Essential Visitor Illness**

- Communicate with families on protocol for self-reporting symptoms of students.
- Students and staff must remain at home when sick or if they have recently had an illness with a fever or a cough.
- Before students and staff who have been ill return to school, they must wait at least 10 days after illness onset and/or 72 hours after fever is gone, without use of fever reducing medicine, and other COVID-19 symptoms (cough, shortness of breath, and/or diarrhea) are improving.
- Individuals who have been exposed to a confirmed or presumptive case of COVID-19 must remain at home and quarantine for 14 days after their last date of exposure before returning to work or school.
- Closely monitor students or staff for symptoms who have a family member in their home that has signs of COVID-19.
- Establish a procedure for removing students, staff, or visitors from contact with the rest of the school population and sending them home when they come to the school sick or become sick at school.
- Follow the steps in the “Emergency Preparedness Plan” if it has been confirmed that a student or staff member has become infected.

All above protocols are subject to change based on new guidelines that may be issued by the Oregon Conference Office of Education, the Oregon Department of Education, the Governor’s Office, and state and local health departments. Our school may need to adjust operations accordingly as changes occur. Presently, field trips, most large-group extra-curricular activities, and other non-essential events are either not permitted or severely restricted.
