

BEST PRACTICES FOR LINING YOUR BINS

Most haulers **do not accept recyclables that are placed in plastic liners**, but if you must use plastic bags to line your bins follow these best practices:

- Use light blue or clear bags to line the recycling bins.
- Use compostable liners to line compost or food waste bins.
- Use black bags to line trash bins.

When placing recyclables in an outdoor dumpster, be sure your custodial staff knows to **empty the loose recyclables into the dumpster and throw the plastic liner in the trash**. To reduce excessive plastic waste and save money you can opt out of using liners.

Blue for Recycling

Green for Compost

Black for Trash

STANDARDIZED LABELS - RECYCLING/COMPOST

The society-wide standardized labels for recycling bins created by the nonprofit organization, Recycle Across America, are proven to be the #1 solution to help people recycle right! Statistics reveal a 50-100% increase in recycling levels and a dramatic decrease the amount of 'garbage' being thrown in recycling bins.

INFORM YOUR FACILITY TEAM - NO PLASTIC BAGS

Engage your school team to ensure they know the best practices and rules.

To prevent plastic bags from going into the recycling dumpster, a **“no plastic bags!”** label should be displayed on custodial recycling carts and on recycling dumpsters. All ‘traditional’ consumer recyclables (such as cans, plastic bottles and cardboard) should be put in the recycling dumpster without being contained in plastic bags. Plastic bags jam and damage recycling processors’ equipment and can subsequently cause injuries to employees trying to unjam the machinery.

ABSOLUTELY NO PLASTIC BAGS IN RECYCLING DUMPSTERS ... EVER!

Empty the recyclables into the recycling dumpster. If you have a plastic bag, put it in the trash or recycle it with a designated plastic bag recycler.

PROPERLY ADHERING THE LABELS

If you've purchased new plastic bins, ALWAYS allow the bins to *breathe (aka off-gas)* for a day or two before applying the labels. For new or old bins, clean the surface to remove oil, dust, dirt and other things that can interfere with the labels sticking properly -- and make sure the surface is dry. As an added assurance, wipe the surface of the bin or cart with rubbing alcohol and allow to dry before applying the labels.

The standardized labels should be applied in a place that will not be obstructed. If you have plastic liners in your bins, make sure the labels aren't put on a spot that could cause them to be covered by the excess plastic liner. A clear view of the labels from all angles is vital. Make sure the recycling bins and trash bins are always side-by-side and always with the recycling bin on the left and the trash bin on the right, for added consistency.

Ask your recycling hauler to paint the dumpsters the same color as your recycling bins and to add the standardized labels to the dumpsters. Also, add the "no plastic bags!" label to your recycling and compost dumpsters. This will help your custodial staff put the correct items in the correct dumpsters.

ENGAGE YOUR CUSTODIAL SERVICES TEAM!

We cannot stress this enough ... **engage and educate your custodial staff about the recycling program!** The point of failure with recycling often happens when the staff isn't educated about the dos and don'ts, or they simply aren't engaged.

- Meet with the custodial staff and go through the toolkit together; this is a great way to cover a variety of topics.
- Or students may wish to do a presentation for custodians (and the cafeteria staff if appropriate).
- Repeat training often.

Set up the program so that it is easy for the custodial staff to follow using the best practices that we've listed in this toolkit. It will help your recycling program succeed and be worthwhile financially.

COMMUNICATING YOUR RECYCLING PROGRAM

LET'S RECYCLE RIGHT!

Choose a launch date, and make a school-wide announcement so that everyone in the building knows there is a change in the recycling program.

- Send an email to classrooms and offices.
- Hang up student-generated posters or RAA posters (RAA will share files upon request).
- Have students develop and record a public service announcement to share via email.
- Student volunteers may wish to travel from class to class to introduce the labels and explain the changes in the recycling program. The toolkit has many points that should be covered in a presentation.

OTHER COMMUNICATION IDEAS

These quick videos explain the importance of the standardized labels, and they can easily be shared in staff meetings or in classrooms.

- This video explains [why standardization is important](#) and how schools may save money.
- A high school student created this [quick video](#) after his school installed the labels.
- [Kristen Bell](#) is featured in a public service announcement for RAA.
- This [humorous and informative](#) video delivers the standardization message.

The Road Safety Analogy for Recycling

 Recycle Across America

Standardized Labels for Recycling Bins - A National Solution

 Recycle Across America

MEASURING SUCCESS AND SAVING MONEY

Contact your city, county and state waste management and government officials to ask if there are any financial incentives for your school to recycle and decrease your school's trash volumes. For example, in Minneapolis, MN the combined state, county and city tax on trash hauling is more than 75%. Meaning if you pay \$1000 for a *trash* dumpster and *trash* hauling, your bill will be more than \$1750 with tax included. But in Minneapolis, there are no taxes charged on *recycling* dumpsters, services or hauling of recyclables.

MONITOR YOUR RECYCLING FOR MONEY

Ask your waste and recycling hauler to help evaluate your building's waste and recycling volumes. When requested, your hauler should be willing to help measure the volume of your trash and the volume of your recyclables. Ask them to provide a complete report including itemized fees for your landfill and separate fees and taxes specifically for your recycling. Once the labels have been in place for one to two months, request a secondary audit to measure improvements in your recycling stream. **We're excited to see your results! Please send your metrics over to info@recycleacrossamerica.org.** It is up to YOUR SCHOOL to request this audit and information if you intend to capture savings.

When possible:

1. Reduce the size of your landfill dumpsters.
2. Reduce the frequency of your landfill hauling.
3. Increase the size of your recycling dumpster.
4. Increase the frequency of your recycling hauling.

TIP: Every school should increase its recycling levels, recycling dumpster sizes, and frequency of hauling recyclables. This will lead to a decrease in landfill/trash dumpster services which can equate to thousands of dollars in savings for your school. Once you've done a baseline audit of your landfill/trash volumes versus your recycling volumes, look for every opportunity to decrease landfill waste and increase 'clean' recycling volumes so that you can capture the financial benefits of recycling.

TIPS FOR CHOOSING COMPOSTABLE PRODUCTS

Composting your school's food waste and compostable products can save your school money by diverting significant amounts of material away from landfills while providing nutrient rich soil supplements to farmers.

Remember to always use 'well marked' 100% compostable, certified liners in your compost bins, and keep your compost bins conveniently placed alongside your recycling bins and trash bins in food service areas.

If you offer compostable dishware and serving-ware, make certain that each product is well marked as compostable.

TIP: Do not mix and match ... in other words do not offer some products that are compostable and other products that aren't compostable. Commit to fully compostable products or no compostable products - because having compostable products accidentally mixed in with traditional recyclables is very problematic for the recycling processors and having traditional plastics going into the compostables bin is equally problematic for the composter.

THANKING YOUR DONOR

Companies and individuals make generous donations to help schools improve recycling. To celebrate this donation, *PLEASE* thank your donor.

Social Media Posts

- Have students and adults take pictures of themselves putting labels on bins or posing with the bins they've labeled. Share the photos with RAA, and we will post them on Twitter and tag your donor and your school, or you may post and tag the donor and RAA.
- It is the responsibility of the school champion (representative) to obtain parental permission as needed. If you are unable to feature students in posts, please take photos of the labeled bins or perhaps a staff member will volunteer to be photographed.
- RAA has a parent permission slip that can be shared with families as needed. Please email eileen@recycleacrossamerica.org for a copy.

Other Ideas

- Students may wish to create thank you cards, banners, or videos. We will be happy to share the donor's contact information.

Please send your thanks in a timely manner. If you are not going to install the labels right away, send out a quick tweet thanking your donor (we are happy to assist) and send photos later.

DO'S AND DON'TS CHEAT SHEET

TOP SEVEN "TO DOS":

- ❑ Consult with your recycling hauler to find out what exactly can and cannot go in your bins.
- ❑ Make sure your bins are properly color-coded and have proper lids.
- ❑ Place standardized labels on your bins and lids.
- ❑ Empty liquids out of containers. Provide a bin or bucket where liquids can be poured.
- ❑ Hang signage on walls behind cafeteria bins if the labels will be blocked when multiple students are sorting their recycling and trash.
- ❑ Properly adhere the labels to dumpsters.
- ❑ Empty your recyclables into the larger dumpster without plastic bags.
- ❑ Engage your custodial staff.
- ❑ Communicate your program.

DON'T:

- ❑ Put plastic bags in the recycling bin.
- ❑ Place recycling bins far away from trash bins.
- ❑ Place labels on areas of the bin with uneven surfaces or that may be covered by liners.
- ❑ Place hazardous material, food, liquid, styrofoam, and other non-recyclables in your recycling stream.

Recycle Across America now has over seven million labels in use with brands such as...
