## Checklist for AAPOR TI

**Survey:** Missouri

<table>
<thead>
<tr>
<th>TI Disclosure Elements</th>
<th>Answers</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Who sponsored the TI Research and who conducted it. If different from the sponsor, the original sources of funding will also be disclosed.</td>
<td>Emerson College</td>
</tr>
<tr>
<td>2. The exact wording and presentation of questions and response options whose results are reported. This includes preceding interviewer or respondent instructions and any preceding questions that might reasonably be expected to influence responses to the reported results.</td>
<td>See Below</td>
</tr>
<tr>
<td>3. A definition of the population under study and its geographic location.</td>
<td>Very likely voters in Missouri</td>
</tr>
<tr>
<td>4. Dates of data collection.</td>
<td>March 4-5, 2020</td>
</tr>
</tbody>
</table>
| 5. A description of the sampling frame(s) and its coverage of the target population, including mention of any segment of the target population that is not covered by the design. This may include, for example, exclusion of Alaska and Hawaii in U.S. surveys; exclusion of specific provinces or rural areas in international surveys; and exclusion of non-panel members in panel surveys. If possible the estimated size of non-covered segments will be provided. If a size estimate cannot be provided, this will be explained. If no frame or list was utilized, this will be indicated. | • Aristotle voter file of 1,022,805 registered voters with landlines, and a random sample of 20,000 landlines drawn.  
• Aristotle voter file of 1,235,561 registered voters with cellphones, and a random sample of 8,000 cellphones drawn.  
• The online sample was of 177 registered voters supplied by MTurk |
| 6. The name of the sample supplier, if the sampling frame and/or the sample itself was provided by a third party. | Aristotle, LLC  
MTurk |
| 7. The methods used to recruit the panel or participants, if the sample was drawn from a pre-recruited panel or pool of respondents. | MTurk uses opt in panels and not online ads to recruit participants |
| 8. A description of the sample design, giving a clear indication of the method by which the respondents were selected, recruited, intercepted or otherwise contacted or encountered, along with any eligibility requirements and/or oversampling. If quotas were used, the variables defining the quotas will be reported. If a within-household selection procedure was used, this will be described. The description of the sampling frame and sample design will include sufficient detail to determine whether the respondents were selected using probability or non-probability methods. | See #5 |
| 9. Method(s) and mode(s) used to administer the survey (e.g., CATI, CAPI, ACASI, IVR, mail survey, web survey) and the language(s) offered. | IVR, SMS-to-Online, Online |
10. Sample sizes (by sampling frame if more than one was used) and a discussion of the precision of the findings. For probability samples, the estimates of sampling error will be reported, and the discussion will state whether or not the reported margins of sampling error or statistical analyses have been adjusted for the design effect due to weighting, clustering, or other factors. Disclosure requirements for non-probability samples are different because the precision of estimates from such samples is a model-based measure (rather than the average deviation from the population value over all possible samples). Reports of non-probability samples will only provide measures of precision if they are accompanied by a detailed description of how the underlying model was specified, its assumptions validated and the measure(s) calculated. To avoid confusion, it is best to avoid using the term “margin of error” or “margin of sampling error” in conjunction with non-probability samples.

The sample consisted of registered voters, n=425, with a Credibility Interval (CI) similar to a poll’s margin of error (MOE) of +/-4.7 percentage points.

A screening question was asked if the voter was registered. If the respondent said they were not registered, they were eliminated from the sample. A secondary screening question was asked to determine voter likelihood; only very likely voters and respondents who had already voted absentee were kept in.

11. A description of how the weights were calculated, including the variables used and the sources of weighting parameters, if weighted estimates are reported.

The data was weighted based on gender, age, ethnicity, party, education and region based on 2016 turnout model. 2016 vote magnitude was used but new voters were included based on their actual sample (12.0%) and was based on Aristotle Voter turnout modeling.

12. If the results reported are based on multiple samples or multiple modes, the preceding items will be disclosed for each. **Reviewer: Type NA if not applicable.**

N/A

13. Contact for obtaining more information about the study.

emersonpolling@emerson.edu

Survey (online)
1. To start, can you please tell me your gender?
   Male
   Female

2. What is your party registration?
   Not registered to vote (end)
   Democrat
   Republican
   Independent/other

3. How likely are you to vote in the Democratic Primary on March 10th?
   Not likely (end)
   Somewhat likely (end)
   Very likely (go to 5)
   I already voted absentee (go to 4)

4. Of the following Democratic candidates for President, whom did you vote for? (randomize online)
   Joe Biden (go to 8)
   Bernie Sanders (go to 8)
   Michael Bloomberg (go to 8)
   Tulsi Gabbard (go to 8)
   Elizabeth Warren (go to 8)
   Someone else (go to 8)

5. Of the following Democratic candidates for President, who would you be most likely to support? (randomize online)
   Joe Biden (go to 7)
   Bernie Sanders (go to 7)
   Tulsi Gabbard (go to 7)
   Elizabeth Warren (go to 6)
   Someone else (go to 8)

6. Which candidate would be your second choice?
   Joe Biden
   Bernie Sanders
   Tulsi Gabbard
   Undecided

6. Will you definitely vote for your candidate or is there at least a chance you could change your mind and vote for someone else?
   I will definitely vote for this candidate
There’s a chance I could change my mind and vote for someone else

7. Who did you vote for in the Democratic Primary in 2016?
   Hillary Clinton
   Bernie Sanders
   Someone Else
   Did not vote in this primary

8. For statistical purposes only, can you please tell me your ethnicity?
   Hispanic or Latino of any race
   White or Caucasian
   Black or African American
   Asian
   Other or multiple races

9. What is your age range?
   18-29 years
   30-49 years
   50-64 years
   65 or more years

10. What is the highest level of education you have attained?
    High school or less
    Some college
    College graduate
    Postgrad or higher

11. Which of the following political ideologies do you most identify as?
    Very Liberal
    Somewhat Liberal
    Moderate
    Somewhat Conservative
    Very Conservative

12. What is your annual household income?
    Less than $50,000
    $50,000 to $100,000
    More than $100,000

13. When did you make up your mind about who to support in the primary?
    Just today
In the last three days
Sometime last week
In the last month
Before that

14. When it comes to deciding for whom you will vote for president, which one of the following is the single most important issue in deciding for whom you will vote (randomized)
The economy
Impeachment
Social issues
Health care
Immigration
Gun control
Foreign policy and terrorism
The environment
Education

15. Which of the following healthcare policies are you most supportive of?
Medicare for All
Public option
Keeping things as is
Undecided

16. Which candidate has the best healthcare policy?
Bernie Sanders
Joe Biden
Elizabeth Warren
Tulsi Gabbard

17. Do you believe that Medicaid expansion in Missouri does enough for children in poverty?
Yes
No
Unsure

18. Do you believe the United States is prepared to control the Coronavirus?
Yes
No
Unsure or no opinion

19. Which congressional district do you live in?

20. Code 805
