ELIMINATING THE CHAOS

Enterprises are unable to effectively manage data due to technology lock-in, complexity and risk

Growth makes it worse

59%
worldwide data growth

800%
compounded annual growth over the next five years

80%
of that growth will be from unstructured data

Enterprises have approached this with archaic tools and manual processes

IT can't keep up

Doesn't even know what data they have

Just keep moving data from one system to another, trying to stay above water ... instead of building value
