“This is such a worthwhile investment. I'm not being boastful, but if you had seen our ECD before and you see it now: it is wow! It's important to invest in your centre and in a curriculum, good equipment and teacher training because you are investing in the children and in your business. It's R35 000 and that sounds like too much but GROW checks your finances to see if you can afford it, and they help you see how to afford it. If they see you can't afford it, they give you guidance on how to run your business better and you can apply again.
