**Be thankful for each day you wake
live as though it's your last
life as you know it today
could be over in a flash.**

**There is no way of knowing
just what tomorrow holds
don't leave love unattended
or unspoken words untold.**

**It only takes a second
simply one moment in time
to change life forever
no reason you can find.**

**It isn't for us to understand
or even question why
each day could be our last
someday we all will die.**

**Those we leave behind
must learn to just go on
life is for the living
although our hearts will mourn.**

**Taking life one day at a time
is what we must strive to do
trusting that God is in control
and watching over you.**
