

# COLLEGE HEIGHTS CHRISTIAN SCHOOL

## Google Apps Online Education Technology (Grades 3-9)

**2018/2019**

Name of Student \_\_\_\_\_ Grade \_\_\_\_\_

As part of classroom work at College Heights Christian School, we will actively use 21<sup>st</sup> century education technology tools in teaching and learning to help better engage students and provide greater learning opportunities.

Specifically, we will be using a suite of secure online applications called Google Apps for Education to develop collaboration, communication and literacy skills. Each student (grade 5 and up) in the school will be provided with an account and password to access these online tools within the secure College Heights Christian School Google Apps website that will only be accessible by the accounts of students at CHCS. These include Gmail (email), Google Docs and Google Sites.

The Google Docs is the location where each student working at the school will be required to save their documents and schoolwork. There are many advantages to this.

- Google Drive will provide each student 30GB of free space, which helps the CHCS infrastructure keep up to the demands of the advancing technology needs while also allowing students to access their school work and documents from any computer, not just when they log into the computer lab at school.
- Google Sites will allow students and teachers to post important instructions and information in a secure way that will allow them to share this with their entire class.
- Gmail (email) will allow them to communicate with the teachers and with other students. However, we at CHCS are also using Edmodo (a secure educational communication tool where teachers can moderate comments posted). So if you do not want to allow your son/daughter to have access to their own email account, please indicate that below. We can then disable the email feature of the Google Apps, and just allow the Google Docs and Google Sites.

Please familiarize yourself with these new tools. Your child will be able to assist you with this.

You may wish to peruse your child's work periodically.

\_\_\_\_\_ I give permission for my son/daughter to use the secure Google Apps online education technology tools.  
(Note: Gmail and Google Sites are only available for students in grades 5-9.)

\_\_\_\_\_ I give permission for my son/daughter to use the secure Google Apps online education technology tools, but **DO NOT** give permission for my son/daughter to have the Gmail feature.
