

February 18, 2021 - AMI additional assignment 3rd & 4th

Do the following assignments first today (Thursday). If you finish early, choose an item from the AMI list to do to complete the 4 hours for today. Enjoy the snow!

Bible/Social Studies – Participate in Random Acts of Kindness week

On the second week of February, people all over the world celebrate Random Acts of Kindness Week by striving to make kindness an inspirational part of people’s lives.

1. Think of ways you can show kindness to your family or in your neighborhood
2. Come up with at least three different things you can do to show kindness today
3. Some ideas to get you thinking are:
 - hide sticky notes in unexpected places letting the people in your family know what you love about them
 - do a chore or something that needs to be done without being asked
 - leave a treat and kind note in the mailbox for the postman
 - spend some extra time playing with or brushing your pet
4. Do the three things (or more) that you chose and record what you did to share when we return to school

Math – Bring math assignments back to school when we are back in classes.

4th grade: Write and solve 15 mixed number addition problems on a piece of paper. The problems should have a whole number and fraction in each addend. Show all work on the paper. Write very neatly and remember to keep place values lined up. Don’t forget to regroup as needed. An example problem:

$$\begin{array}{r} 4 \frac{1}{4} \\ + 5 \frac{3}{4} \\ \hline \end{array}$$

3rd grade: Write and solve 15 multiplication problems on a piece of paper. The problems should have one addend ending in zero, and one single digit addend. Show all work on the paper. Write very neatly. Example problems: $20 \times 9 = \underline{\quad}$ $30 \times 8 = \underline{\quad}$

Reading – Read a book or part of a chapter book. Write down what book, or what portion of what book, you read. Write five sentences describing what you have read. Make sure your sentences are complete!
